Artificial Intelligence-Empowered Bio-medical Applications Dimitrios P. Panagoulas, George A. Tsihrantzis, Maria Virvou, 2025-07-19

The book delves into advancements in personalized medicine highlighting the transition from generalized treatments to tailored strategies through AI and machine learning. It first emphasizes the role of biomarkers in training predictive models and neural networks enhancing disease diagnosis and patient management. It then explores AI driven healthcare systems particularly the use of microservices to improve scalability and management. Additionally it examines regulatory challenges the need for AI explainability and the PINXEL framework which defines explainability requirements using the technology acceptance model TAM and the diffusion of innovation theory DOI. Furthermore the book evaluates the capabilities of large language models including ChatGPT and GPT 4V in medical applications with a focus on diagnosis and structured assessments in general pathology. Lastly it introduces an AI powered system for primary care diagnosis that integrates language models machine learning and rule based systems. The interactive AI assistants Med Primary AI assistant and Dermacen Analytica leverage natural language processing image analysis and multi modal AI to enhance patient interactions and provide healthcare professionals with high accuracy personalized diagnostic support. By taking a holistic approach the book underscores the integration of AI into healthcare aiming to support medical professionals in patient diagnosis and management with precision and adaptability.

**Intensive Care Medicine MCQs** Shoneen Abbas, Ruth Herod, Daniel Horner, 2015-04-01. Intensive care medicine is a dynamic and evolving specialty requiring its practitioners to be part physician physiologist and anaesthetist. This requires a firm foundation of knowledge and an ability to apply this to the clinical situation. This book contains 270 multiple choice questions allowing self assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false MTF and 30 single best answer SBA questions covering areas including resuscitation diagnosis disease management organ support and ethical and legal aspects of practice. The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine while the SBA questions test the ability of the candidate to prioritise compete options and make the best decision for the patient. Each question is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with firsthand experience of professional examinations in the specialty. This book will appeal to intensive care physicians approaching professional examinations worldwide including the European Diploma American Board and Faculty of Intensive Care Medicine examinations. In addition it will appeal to intensive care nurses and allied healthcare professionals wishing to update their knowledge as part of continuing professional development and to physicians sitting professional examinations in related specialties requiring knowledge of intensive care medicine such as general medicine general surgery and anaesthesia.
