The New Critical Thinking Jack Lyons, Barry Ward, 2017-08-09 Why is it so hard to learn critical thinking skills Traditional textbooks focus almost exclusively on logic and fallacious reasoning ignoring two crucial problems As psychologists have demonstrated recently many of our mistakes are not caused by formal reasoning gone awry but by our bypassing it completely We instead favor more comfortable but often unreliable intuitive methods Second the evaluation of premises is of fundamental importance especially in this era of fake news and politicized science This highly innovative text is psychologically informed both in its diagnosis of inferential errors and in teaching students how to watch out for and work around their natural intellectual blind spots It also incorporates insights from epistemology and philosophy of science that are indispensable for learning how to evaluate premises The result is a hands on primer for real world critical thinking The authors bring over four combined decades of classroom experience and a fresh approach to the traditional challenges of a critical thinking course effectively explaining the nature of validity assessing deductive arguments reconstructing identifying and diagramming arguments and causal and probabilistic inference Additionally they discuss in detail important frequently neglected topics including testimony the nature and credibility of science rhetoric and dialectical argumentation

Key Features and Benefits Uses contemporary psychological explanations of and remedies for pervasive errors in belief formation There is no other critical thinking text that generally applies this psychological approach Assesses premises notably premises based on the testimony of others and evaluation of news and other information sources No other critical thinking textbook gives detailed treatment of this crucial topic Typically they only provide a few remarks about when to accept expert opinion argument from authority Carefully explains the concept of validity paying particular attention in distinguishing logical possibility from other species of possibility and demonstrates how we may mistakenly judge invalid arguments as valid because of belief bias Instead of assessing an argument's validity using formal mathematical methods i.e. truth tables for propositional logic and Venn diagrams for categorical logic provides one technique that is generally applicable explicitly showing that it is impossible to make the conclusion false and the premises true together For instructors who like the more formal approach the text also includes standard treatments using truth tables and Venn diagrams Uses frequency trees and the frequency approach to probability more generally a simple method for understanding and evaluating quite complex probabilistic information Uses arguments maps which have been shown to significantly improve students reasoning and argument evaluation

The Best of Times, The Worst of Times Michael Burleigh, 2017-11-02 In the decades since the end of the Second World War it has been widely assumed that the western model of liberal democracy and free trade is the way the world should be governed However events in the early years of the twenty first century first the 2003 war with Iraq and its chaotic aftermath and second the financial crash of 2008

have threatened the general acceptance that continued progress under the benign or sometimes not so benign gaze of the western powers is the only way forwards And as America turns inwards and Europe is beset by austerity politics and populist nationalism the post war consensus looks less and less secure But is this really the worst of times In a forensic examination of the world we now live in acclaimed historian Michael Burleigh sets out to answer that question Who could have imagined that China would champion globalization and lead the battle on climate change Or that post Soviet Russia might present a greater threat to the world s stability than ISIS And while we may be on the cusp of still more dramatic change perhaps the risks will in time bring not only change but a wholly positive transformation Incisive robust and always insightful The Best of Times The Worst of Times by Michael Burleigh is both a dazzling tour d horizon of the world as it is today and a surprisingly optimistic vision of the world as it might become

Writing of Today John William Cunliffe,Gerhard Richard Lomer,1920 Autism, Bullying and Me Emily Lovegrove,2020-05-21 It's not always easy to stand out from the crowd

especially if you're a teenager There's a lot of information out there on how to deal with bullying but a lot of it is contradictory or seems like it won't work But this guidebook is different Helping you sort fact from fiction the book looks at the different forms bullying can take and debunks commonly held myths such as bullying makes you stronger and ignore it and it will stop You'll learn techniques to clear your mind so that you can respond to bullying situations calmly and confidently and be positive about who you are Finally it's packed with self-empowering strategies for coping with being autistic in a neurotypical world and practical tips so you can handle any bullying scenario The Rise of the Curator Class Steffon Davis, 2019-03-14 Pairing big ideas in marketing with the popular activity of content curation The Rise of the Curator Class positions curation as a humanization movement that is restructuring the internet Curation is set to overturn the 2.2 trillion global creative industry revolutionizing how we create market and discover content In the era of content overload and fake news in which everything to buy listen to read or watch is available online there is one group of people who have learned to thrive in this climate of superabundance the curator class whose influence and power grows as more people look to them as guides This new curator class is rewriting traditional curation tackling the overload and making sense of it for others In the past curation was available to an elite few Now internet platforms such as Pinterest Spotify and Twitter empower hundreds of millions of people to curate their ideas for anyone who may be interested revolutionizing how content is marketed and sold The Rise of the Curator Class explains how curation is disrupting internet commerce as consumer trust moves farther away from traditional brands and closer to the curators who lead tastes and it equips readers to think critically about how curation can work for them Christians in the Age of Outrage Ed Stetzer, 2018-10-02 Are you tired of reading another news story about Christians supposedly acting at their worst Today there are too many examples of those claiming to follow Christ being caustic divisive and irrational contributing to dismissals of the Christian faith as hypocritical self-interested and politically co-opted What has happened in our society One short outrageous video whether it is true or not can trigger an avalanche of comments on social media Welcome to the new age of outrage In this groundbreaking book featuring new survey research of evangelicals and their relationship to the age of outrage Ed Stetzer offers a constructive way forward You won't want to miss Ed's insightful analysis of our chaotic age his commonsensical understanding of the cultural currents and his compelling challenge to Christians to live in a refreshingly different way **South Africa's Dreams** Robert J. Gordon, 2021-02-05 In the early sixties South Africa's colonial policies in Namibia served as a testing ground for many key features of its repressive Grand Apartheid infrastructure including strategies for countering anti-apartheid resistance Exposing the role that anthropologists played this book analyses how the knowledge used to justify and implement apartheid was created Understanding these practices and the ways in which South Africa's experiences in Namibia influenced later policy at home is also critically evaluated as is the matter of adjudicating the many South African anthropologists who supported the regime The Worst Is Yet to Come Peter Fleming, 2019-01-15 Capitalism is about to commit suicide and is

threatening to take us down with it But will it give way to a grand social utopia or the beginning of a new dark age albeit WiFi enabled The Worst is Yet to Come explores the disturbing possibility that the current crisis of neoliberal capitalism isn't going to spawn an emancipatory renaissance but a world that is much much worse Wealthy CEOs see it They've been purchasing isolated bunker retreats in New Zealand for when the shit goes down Our politicians know it too and are frantically transforming the liberal state into a militarized machine Scientists are either uselessly decrying the looming ecological catastrophe or jumping on the opportunity to conduct ever reckless experiments with the human genome The animal kingdom is retreating from the scene in terrible silence preferring the swift demise of the abattoir's bolt gun than witnessing what is about to happen Yet some of us are still ignoring the warning signs choosing instead to remain cheerfully optimistic believing that society has probably hit rock bottom and the only way is up This book argues the opposite What if we haven't hit rock bottom and are on the precipice of something much worse And what if we're too late But this grim prospect isn't submitted in the name of millennial fatalism or hopeless resignation On the contrary if our grandchildren are to survive the implosion of capitalism for the chances we will are fairly slim then a realistic picture of the nightmare to come is crucial Only an unwavering attitude of revolutionary pessimism will help us to prepare accordingly For the apocalypse will almost certainly be disappointing
