Capturing Social and Behavioral Domains and Measures in Electronic Health Records Institute of Medicine,Board on Population Health and Public Health Practice,Committee on the Recommended Social and Behavioral Domains and Measures for Electronic Health Records,2015-01-08 Determinants of health like physical activity levels and living conditions have traditionally been the concern of public health and have not been linked closely to clinical practice However if standardized social and behavioral data can be incorporated into patient electronic health records EHRs those data can provide crucial information about factors that influence health and the effectiveness of treatment Such information is useful for diagnosis treatment choices policy health care system design and innovations to improve health outcomes and reduce health care costs Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs This report is the second part of a two part study The Phase 1 report identified 17 domains for inclusion in EHRs This report pinpoints 12 measures related to 11 of the initial

domains and considers the implications of incorporating them into all EHRs This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material Standardized use of EHRs that include social and behavioral domains could provide better patient care improve population health and enable more informative research The recommendations of Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 will provide valuable information on which to base problem identification clinical diagnoses patient treatment outcomes assessment and population health measurement Undergraduate Mathematics for the Life Sciences Glenn Ledder,Jenna P.

Carpenter,Timothy D. Comar,2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see **Learning as Development**

Daniel A. Wagner,2017-10-04 Learning is the foundation of the human experience It begins at birth and never stops a continuous and malleable link across life stages of human development Disparities in learning access and outcomes around the world have deep consequences for income social mobility health and well being For international development practitioners faced with today s unprecedented environmental and geopolitical pressures learning should be viewed as a touchstone and target for those seeking to truly effect global change This book traces the path of international development work from its pre colonial origins to the emergence of economics as the dominant discipline in the field and lays out a new agenda for policymakers researchers and practitioners from early education through adulthood Learning as Development is an attempt to rethink international education in a changing world
