The Routledge Handbook of Economic Theology Stefan Schwarzkopf,2020-03-24 This Handbook introduces and systematically explores the thesis that the economy economic

practices and economic thought are of a profoundly theological nature. Containing more than 40 chapters, this Handbook provides a state-of-the-art reference work that offers students, researchers, and policymakers an introduction to current scholarship, significant debates, and emerging research themes in the study of the theological significance of economic concepts and the religious underpinnings of economic practices in a world that is increasingly dominated by financiers, managers, forecasters, market makers, and entrepreneurs. This Handbook brings together scholars from different parts of the world, representing various disciplines and intellectual traditions. It covers the development of economic thought and practices from antiquity to neoliberalism and provides insight into the economic theological teachings of major religious movements. The list of contributors combines well-established scholars and younger academic talents. The chapters in this Handbook cover a wide array of conceptual, historical, theoretical, and methodological issues and perspectives, such as the economic meaning of theological concepts (e.g., providence and faith), the theological underpinnings of economic concepts (e.g., credit and property), the religious significance of socio-economic practices in various organizational fields (e.g., accounting and work), and finally, the genealogy of the theological-economic interface in Judaism, Christianity, Islam, and in the discipline of economics itself (e.g., Marx, Keynes, and Hayek). The Routledge Handbook of Economic Theology is organized in four parts: Theological concepts and their economic meaning; Economic concepts and their theological anchoring; Society, management, and organization; Genealogy of economic theology. Accountability after Economic Crisis Iosif Kovras, 2025-02-11

Accountability after Economic Crisis reconstructs the captivating story of how different nations responded to the 2008 economic crisis, one of the most challenging economic downturns in modern history. The book focuses on puzzling cross-country variations in policies of accountability. Why did some countries look for explanations of the economic failure and seek to hold those responsible to account, while others looked the other way? And among those countries looking for the truth, were some more successful than others? If so, were certain methods more effective than others? Is there, in fact, a best way? Iosif Kovras introduces an innovative framework to explain the varied political responses to an economic crisis, pushing the boundaries of traditional analysis by drawing on political economy, comparative politics, public administration, economic history, criminal law, and criminology. To test this framework, he draws on five post-2008 case studies: Ireland, Iceland, Greece, and Cyprus, and adds the experience of the United States in the Great Depression to refine the framework. He identifies three distinct accountability mechanisms used by leaders: retribution (prosecuting those at fault), truth recovery (establishing commissions of inquiry to reveal the facts), and official acknowledgment (issuing formal apologies). Zeroing in on each country in turn, he shows how these mechanisms were employed and with what effect. Featuring original observations from a survey in Iceland and experimental data from a conjoint experiment, Accountability after Economic Crisis provides a thorough and engaging examination of how countries manage accountability in the wake of an economic crisis. False Alarm Bjorn Lomborg, 2020-07-14. An essential Times UK and meticulously researched Forbes book by the skeptical environmentalist.

argues that panic over climate change is causing more harm than good Hurricanes batter our coasts Wildfires rage across the American West Glaciers collapse in the Arctic Politicians activists and the media espouse a common message climate change is destroying the planet and we must take drastic action immediately to stop it Children panic about their future and adults wonder if it is even ethical to bring new life into the world Enough argues bestselling author Bjorn Lomborg Climate change is real but it is not the apocalyptic threat that we've been told it is Projections of Earth's imminent demise are based on bad science and even worse economics In panic world leaders have committed to wildly expensive but largely ineffective policies that hamper growth and crowd out more pressing investments in human capital from immunization to education False Alarm will convince you that everything you think about climate change is wrong and points the way toward making the world a vastly better if slightly warmer place for us all

Leadership in Action Jim Dueck, 2020-02-12 This book outlines how administrators in our school system can move from managerial efforts to leadership functions Identifying taxpayers as the school systems foremost client presents leaders with the critical perspective for ensuring accountability Government is the taxpayers servant and act as managers of educational funding and programs and is supported by administrators working in schools districts and regional offices A key understanding is that school is a student's place of work and current processes for evaluating and reporting their progress identifies them as the most accountable workers in our culture Taxpayers are better served when educators and government are held accountable by

similar assessment processes Accountability is enhanced when power for selecting teachers and schools is shifted from administrators to parents and quantifiable information provides the basis for these decisions Ensuring that students have their learning assessed consistently guarantees fairness to students and provides critical information for parents and taxpayers Proven leadership strategies for ensuring accountability and superior levels of performance are presented for each administrative level Green indicators to inform circular economy under climate change Muhlis Can,Bodo Sturm,Jan Brusselaers,2023-03-08 Enterprise Risk Management Mirna Jabbour,Jason Crawford,2024-12-02 ERM is considered a dynamic capability that is critical to companies success from strategic and performance perspectives and is increasingly implemented in response to growing pressure from external stakeholders to enact and add legitimacy to existing management control systems However implementing ERM is a challenging process where success is dependent on balancing technical and social factors This book explores the challenges of implementing ERM from technical cognitive and social perspectives to enhance the organisation s capacity to generate and integrate information and knowledge about risk and uncertainty In existing publications ERM implementation is mainly viewed from technical or educational perspectives and treated as formal technical linear processes This book takes a different stance by recognising that implementation depends on formal and informal mechanisms that require a balanced combination of technical and social approaches It changes the paradigm to demonstrate that the implementation of ERM is not a linear process that is similar across industries and organisations but relies on multiple dependencies such as leadership corporate governance and the culture of the organisation This book will be a valuable resource for scholars as well as upper level students across disciplines related to risk management including accounting and finance business and management leadership and organisational studies

Babies for Sale? Miranda Davies,2017-03-15 Transnational surrogacy the creation of babies across borders has become big business Globalization reproductive technologies new family formations and rising infertility are combining to produce a quiet revolution in social and medical ethics and the nature of parenthood Whereas much of the current scholarship has focused on the US and India this groundbreaking anthology offers a far wider perspective Featuring contributions from over thirty activists and scholars from a range of countries and disciplines this collection offers the first genuinely international study of transnational surrogacy Its innovative bottom up approach rooted in feminist perspectives gives due prominence to the voices of those most affected by the global surrogacy chain namely the surrogate mothers donors prospective parents and the children themselves Through case studies ranging from Israel to Mexico the book outlines the forces that are driving the growth of transnational surrogacy as well as its implications for feminism human rights motherhood and masculinity

Hormones and Economic Behavior Pablo Brañas-Garza,Levent Neyse,Martin Voracek,Ulrich Schmidt,Monica Capra,2019-01-29 Behavioral correlates of hormones emphasized by psychologists have captured the attention of economists in the past years Behavioral economists in particular have investigated the possible roles of hormones on economic decision

making and behavior as well as social preferences and cognitive abilities Testosterone oxytocin dopamine serotonin and stress hormones are the foremost studied ones in economic contexts Yet the results are mixed and the relationship between hormones and economic behavior is under investigated to this date Hormone levels are measurable and manipulatable e g activate de activate block The fact that the behavioral economics also employs experimental methodology makes it possible to observe both correlational and causal relationships between hormones and economic behavior Since numerous environmental social and biological factors interact with hormone fluctuations capturing the true impacts of hormones on decisions and behavior is challenging Manipulating hormone levels in the body is a method that is used to tackle this issue Such studies compare observed behaviors of hormones or placebo administrated participants to determine causal relationships This Research Topic welcomes the studies on the direct or indirect correlates of hormones on economic behavior and decision making to create new insights on the economic consequences of endocrine activity

State-to-state Arbitration based on International Investment Agreements Angshuman Hazarika, 2020-09-14 This book discusses the use of the compromissory clause in international investment agreements IIAs for interstate dispute resolution It puts forward the possibility of using state to state arbitration based on the compromissory clause in IIAs as an alternative means of resolving investment disputes in light of the global debate on the shortcomings of investor state arbitration The book s main conclusion is that state to state arbitration may be used as an alternative to currently popular investor state arbitration by resolving procedural hurdles which impede its acceptance It becomes more important with the removal of investor state arbitration as an option in certain recent IIAs which then elevates state to state arbitration as the sole option for binding third party dispute resolution in the treaty Even then it is unlikely to replace investor state arbitration completely due to its inherent shortcomings such as the risk of re politicising disputes and a lack of direct control over the process for the affected investors Nevertheless the availability of an alternative forum will benefit all parties involved as they will no longer be wholly dependent on investor state arbitration which can be affected by events such as denunciation from the ICSID Convention or the refusal of a host state to enforce an arbitration award

Cambridge Economics in the Post-Keynesian Era Ashwani Saith, 2022-11-11 This book chronicles the rise and especially the demise of diverse revolutionary heterodox traditions in Cambridge theoretical and applied economics investigating both the impact of internal pressures within the faculty as also the power of external ideological and political forces unleashed by the global dominance of neoliberalism Using fresh archival materials personal interviews and recollections this meticulously researched narrative constructs the untold story of the eclipse of these heterodox and post Keynesian intellectual traditions rooted and nurtured in Cambridge since the 1920s and the rise to power of orthodox mainstream economics Also expunged in this neoclassical counter revolution were the structural and radical policy oriented macro economic modelling teams of the iconic Department of Applied Economics along with the atrophy of sociology development and economic history from teaching and research in the self purifying faculty This

book will be of particular interest to researchers in the history of economic thought sociology of knowledge political economy especially those engaged in heterodox and post Keynesian economics and to everyone wishing to make economics fit for purpose again for negotiating the multiple economic social and environmental crises rampant at national and global levels
