Lesh,Eric Hamilton,James J. Kaput,2020-10-07 The central question addressed in Foundations for the Future in Mathematics Education is this What kind of understandings and abilities should be

emphasized to decrease mismatches between the narrow band of mathematical understandings and abilities that are emphasized in mathematics classrooms and tests and those that are needed for success beyond school in the 21st century. This is an urgent question. In fields ranging from aeronautical engineering to agriculture and from biotechnologies to business administration outside advisors to future oriented university programs increasingly emphasize the fact that beyond school the nature of problem solving activities has changed dramatically during the past twenty years as powerful tools for computation conceptualization and communication have led to fundamental changes in the levels and types of mathematical understandings and abilities that are needed for success in such fields. For K 12 students and teachers questions about the changing nature of mathematics and mathematical thinking beyond school might be rephrased to ask: If the goal is to create a mathematics curriculum that will be adequate to prepare students for informed citizenship as well as preparing them for career opportunities in learning organizations in knowledge economies in an age of increasing globalization how should traditional conceptions of the 3Rs be extended or reconceived? Overall this book suggests that it is not enough to simply make incremental changes in the existing curriculum whose traditions developed out of the needs of industrial societies. The authors beyond simply stating conclusions from their research use results from it to describe promising directions for a research agenda related to this question. The volume is organized in three sections. Part I focuses on naturalistic observations aimed at clarifying what kind of mathematical thinking people really do when they are engaged in real life problem solving or decision making situations beyond school. Part II shifts attention toward changes that have occurred in kinds of elementary but powerful mathematical concepts topics and tools that have evolved recently and that could replace past notions of basics by providing new foundations for the future. This section also initiates discussions about what it means to understand the preceding ideas and abilities. Part III extends these discussions about meaning and understanding and emphasizes teaching experiments aimed at investigating how instructional activities can be designed to facilitate the development of the preceding ideas and abilities. *Foundations for the Future in Mathematics Education* is an essential reference for researchers curriculum developers assessment experts and teacher educators across the fields of mathematics and science education.

Can You Hear Me Now? Celina Caesar-Chavannes, 2022-04-12

SHORTLISTED FOR THE 2021 SHAUGHNESSY COHEN PRIZE FOR POLITICAL WRITING

In *Can You Hear Me Now*, Celina Caesar-Chavannes digs deep into her childhood and her life as a young Black woman, entrepreneur, and politician, and shows us that effective and humane leaders grow as much from their mistakes and vulnerabilities as from their strengths. Celina Caesar-Chavannes, already a breaker of boundaries as a Black woman in business, got into politics because she wanted to make a bigger difference in the world. But when she became the first Black person elected to represent the federal riding of Whitby, Ontario, she hadn't really thought about the fact that Ottawa wasn't designed for someone like her. Celina soon found herself both making waves and breaking down, confronting at night alone in her Ottawa apartment all the painful beauty of her childhood and her troubled early adult life. She paid the price for speaking out about micro-aggressions and speaking up for her community and her riding, but she also felt exhilaration and empowerment. As she writes, "This is not your typical leadership book where the person is placed in a situation and miraculously comes up with the right response for the wicked problem. This is the story of me falling in love at last with who I am and finding my voice in the unlikeliest of places. Both memoir and leadership book, *Can You Hear Me Now* is a funny, self-aware, poignant, confessional, and fierce look at how failing badly and screwing things up completely are truly more powerful lessons in how to conduct a life than extraordinary success. They build an utter honesty with yourself and others that allows you to say things nobody else dares to say, the necessary things about navigating the places that weren't built for you and holding firm to your principles. And if you do that, you will help build a world where inclusion is real. Just as Celina is now trying to do in all her brilliance and boldness."
