**Mental Health Providers Guide To Managed Care** Leonard Reich, Andrew Kolbasovsky, 2006 For both patients and providers the words managed care are loaded with negative connotations synonymous with inefficiency and bureaucracy Forced to perform a delicate balancing act of offering the best possible care for their clients while carefully adhering to various managed care policies and procedures providers in particular often wince at the prospect of having to deal with managed care companies or MCOs Fearing burdensome paperwork low reimbursement rates and denials of care it's not surprising that a number of mental health professionals choose to limit their involvement with managed care companies or eliminate it altogether My clients are all on different health plans how can I keep the policies straight Getting services approved is so time consuming that I'm better off accepting only self-paying clients aren't I Do the benefits of working with MCOs really outweigh the drawbacks The answer according to two industry insiders is yes If you know how to work with the system the system can work for you
