Abstract *Background:* Despite the wealth of data suggesting an important role for the brain in health and disease, the brain has been largely neglected in research. This is due to the complexity of the brain, which has been a major barrier to understanding its function. The complexity of the brain is due to its size, its structure, and its function. The brain is the most complex organ in the body, and it is the only organ that can think. The brain is the seat of consciousness, and it is the only organ that can feel. The brain is the source of all human thought and action, and it is the only organ that can create art and science. The brain is the most important organ in the body, and it is the only organ that can be studied in a laboratory. TABLE 1. Summary of the 1997-1998 season for the 1000-hour program

Dr. Schuchman, the program director, says the program is composed of 100 "modules" and usually is delivered as a 10-day intensive in a classroom setting. The 100 modules include everything a teacher needs to know about the following important subjects: the student's development as an individual, understanding individuality, the teacher's role, the student's role, the classroom as a community, and the teacher's role in the classroom. The program is designed to be delivered in a 10-day intensive format, but it can be adapted to a 20-day format.
