Handbook of Inter-Rater Reliability, 4th Edition Kilem L. Gwet,2014-09-07 The third edition of this book was very well received by researchers working in many different fields of research The use of that text also gave these researchers the opportunity to raise questions and express additional needs for materials on techniques poorly covered in the literature For example when designing an inter rater reliability study many researchers wanted to know how to determine the optimal number of raters and the optimal number of subjects that should

participate in the experiment Also very little space in the literature has been devoted to the notion of intra rater reliability particularly for quantitative measurements The fourth edition of this text addresses those needs in addition to further refining the presentation of the material already covered in the third edition Features of the Fourth Edition include New material on sample size calculations for chance corrected agreement coefficients as well as for intraclass correlation coefficients The researcher will be able to determine the optimal number raters subjects and trials per subject The chapter entitled Benchmarking Inter Rater Reliability Coefficients has been entirely rewritten The introductory chapter has been substantially expanded to explore possible definitions of the notion of inter rater reliability All chapters have been revised to a large extent to improve their readability Evidence-Based Nursing Alba DiCenso,Gordon Guyatt,Donna Ciliska,2005-01-10 Evidence Based Nursing is written in response to numerous requests by nurse practitioners and other graduate faculty for a nursing literature resource This reader friendly accessible guide features plentiful examples from the nursing literature and the addition of specific nursing issues such as qualitative research with direct application for clinical practice The guide enables nurses to frame their clinical questions in a way that will help them find the evidence to support their opinions distinguish between strong and weak evidence clearly understand study results weigh the risks and benefits of management options and apply the evidence to their individual patients to improve outcomes Part One provides a basic approach to the problems faced by nurses when determining optimal care predicting patient progress and protecting patients from potentially harmful side effects in addition to including a literature assessment summary and management recommendations Part Two expands on Part One providing concrete examples through case studies This is the only book of its kind that helps nurses use the nursing literature effectively to solve patient problems Three step approach to dissecting a problem to help find the best evidence and improve patient care most questions can be divided into three parts 1 Are the results valid 2 What are the results and 3 How can I apply the results to patient care Part One The Basics Using the Nursing Literature provides a basic approach to the problems faced by nurses when determining optimal care predicting patient progress and protecting patients from potentially harmful side effects and includes a literature assessment summary and management recommendations Part Two Beyond the Basics Using and Teaching the Principles of Evidence Based Nursing expands on Part One providing concrete examples through the presentation of cases Two part organization helps both beginners and those more accomplished at using the nursing literature Clinical Scenario provides a brief but detailed description of a clinical situation that requires the application of research through a critical thinking process Using the Guide examines a clinical scenario and then evaluates the way in which research findings are collected analyzed and applied to the resolution of the problem presented in the scenario Free CD ROM contains everything found in the book allowing for electronic outlining content filtering full text searching and alternative content organizations **Artificial Intelligence and Machine Learning in Health Care and Medical Sciences** Gyorgy J.
