two major river systems the Nile and the Tigris Euphrates in an era of impending climate crisis These themes form the essence of themes that are discussed in the chapters that follow Keith McLachlan played a significant role in our understanding of these themes and of their effects in the contemporary world as the comments of those who worked with him and have contributed towards this book reveal Examining agriculture oil and state construction this volume offers an insight into how the contemporary Middle East was constructed after the collapse of the Ottoman Empire It is a key resource for scholars and students interested in geopolitics and the geography of the Middle East *21st-Century Statecraft* Nayef Al-Rodhan,2022-07-28 From civilisational frontier risks associated with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion the 21st century requires a new approach to statecraft In 21st Century Statecraft Professor Nayef Al Rodhan proposes five innovative statecraft concepts He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity based governance He shows how in an interdependent and interconnected world traditional thinking must move beyond zero sum games and focus on multi sum and symbiotic realist interstate relations This requires a new paradigm of global security premised on five dimensions of security and a new concept of power just power which highlights the centrality of justice to state interests These concepts enable states to balance competing interests and work towards what the author calls reconciliation statecraft Throughout Professor Al Rodhan brings his philosophical and neuroscientific expertise to bear providing a practical model for conducting statecraft in a sustainable way *Advances in Women's Empowerment* Araceli Ortega Díaz,Marta Bárbara Ochman,2020-09-21 What progress has been made to achieve SDG5 Bridging the academic and policymaking spaces this edited collection offers a critical insight and evaluation of the public policies targeted at improving the condition of women living in developing countries across Asia Africa and Latin America *Understanding Security Practices in South Asia* Monika Barthwal-Datta,2012 This book aims to explore the ways in which non state actors NSAs in South Asia media actors epistemic communities non governmental organisations NGOs civil society groups and others are involved in securitising non traditional security challenges in the region at the domestic and regional levels **Kashmiri Nationalism, 1989-2016** Arshi Javaid,2024-12-12 Kashmiri nationalism is defined by its dichotomy between the ethnic and the civic Arshi Javaid delves into this dichotomy unravelling the political and social variables that shape it Moving beyond a conventional securitized perspective on the Kashmir conflict she offers an understanding of Kashmiri nationalism as a daily practice This perspective critiques the view that reduces Kashmiri nationalism to a monolithic entity highlights dynamic socio political developments and argues that the state nationalist majoritarian agenda undermines collective rights erodes local identities and escalates tensions breeding confrontation Bulletin of the Atomic Scientists ,1993-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world India-Pakistan Nuclear

Diplomacy Mario E. Carranza, 2016-07-15 The conventional wisdom based on realist premises is that nuclear weapons are an irreversible reality in South Asia and that efforts to denuclearize the subcontinent are a futile endeavor As a result real nuclear arms control in South Asia remains elusive and scholars continue focusing their efforts on how to achieve crisis stability and deterrence stability in future Indo Pakistani confrontations However they tend to analyze India and Pakistan's nuclear diplomacy as if the nuclear competition occurred in complete isolation from the changing dynamics of the international social environment Using a constructivist model this study brings nuclear arms control and disarmament back into the debates on the future of Indo Pakistani relations Constructivism recognizes the independent impact of international norms such as the Nuclear Non Proliferation Norm NNPN on India and Pakistan's nuclear behavior Even though the NNPN does not legally bind them it is reinforced at the global level and may lead the South Asian rivals to move in the direction of nuclear arms control and disarmament thus reducing the costs dangers and risks of an eternal strategic rivalry After examining the main tenets of constructivism in international relations the work delves into the proliferation debate discussing nuclear reversal and U S policy toward the subcontinent since the G W Bush administration It looks at the prospects for nuclear arms control and disarmament in South Asia after the U S India nuclear deal of 2008 and the nuclear abolitionist wave during the first Obama administration It concludes with the contribution of social constructivism to understanding how changes in the India Pakistan nuclear status quo can happen *South Asia's Nuclear Security* Bhumitra Chakma, 2014-12-17 South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism But how valid are such perceptions This book seeks to address this question and assesses the region's nuclear security from two principal standpoints First it evaluates the robustness of the Indo Pakistani mutual deterrence by analysing the strength and weaknesses of the competing arguments regarding the issue It also analyses the causes and consequences of nuclear arms race between India and Pakistan the nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia's nuclear deterrence Second it assesses the safety and security of the nuclear assets and nuclear infrastructure of India and Pakistan The author holds that the debate on South Asia's nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists It is argued that while the risks of nuclear weapons are significant it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future Therefore what needs to happen is that while nuclear elimination should be the long term goal in the interim years the two countries need to pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non state actors
