

KATO*Automatic Cruise Stopper***ACS**[®]**SERVICE
MANUAL****MS-10C-IIA****KATO WORKS CO.,LTD.****PREFACE**

This Manual has been compiled as a handbook for servicing "Cruspeed", the new automatic digital control prevention device which is fitted to KATO vessels.

Unlike the conventional analog ACS device, the new digital ACS system with its built-in microprocessor has a self-diagnostic function for servicing in addition to its function as an control prevention device. Consequently, while the conventional analog ACS device requires a service log for data collection, this can now be performed by the digital ACS system with its self-diagnostic function. Furthermore, it has become possible to automatically monitor the status of the control prevention device itself during routine cruise operations, resulting in improved reliability. However, even the most advanced electronic circuit provide adequate cruise control performance unless the procedure is correctly followed by service engineers.

It is therefore recommended that this Manual be read thoroughly so that the appropriate service techniques can be mastered.
