Coan,John J.B. Allen,2007-04-19 Emotion research has become a mature branch of psychology with its own standardized measures induction procedures data analysis challenges and sub disciplines During the last decade a number of books addressing major questions in the study of emotion have been published in response to a rapidly increasing demand that has been fueled by an increasing number of psychologists whose research either focus on or involve the study of emotion Very few of these books however have presented an explicit discussion of the tools for conducting research despite the facts that the study of emotion frequently requires highly specialized procedures instruments and coding strategies and that the field has reached a place where a large number of

excellent elicitation procedures and assessment instruments have been developed and validated Emotion Elicitation and Assessment corrects this oversight in the literature by organizing and detailing all the major approaches and instruments for the study of emotion It is the most complete reference for methods and resources in the field and will serve as a pragmatic resource for emotion researchers by providing easy access to a host of scales stimuli coding systems assessment tools and innovative methodologies This handbook will help to advance research in emotion by encouraging researchers to take greater advantage of standard and well researched approaches which will increase both the productivity in the field and the speed and accuracy with which research can be communicated

Emotion-Oriented Systems Paolo Petta, Catherine Pelachaud, Roddy Cowie, 2011-02-04 Emotion pervades human life in general and human communication in particular and this sets information technology a challenge Traditionally IT has focused on allowing people to accomplish practical tasks efficiently setting emotion to one side That was acceptable when technology was a small part of life but as technology and life become increasingly interwoven we can no longer ask people to suspend their emotional nature and habits when they interact with technology The European Commission funded a series of related research projects on emotion and computing culminating in the HUMAINE project which brought together leading academic researchers from the many related disciplines This book grew out of that project and its chapters are arranged according to its working areas theories and models signals to signs data and databases emotion in interaction emotion in cognition and action persuasion and communication usability and ethics and good practice The fundamental aim of the book is to offer researchers an overview of the related areas sufficient for them to do credible work on affective or emotion oriented computing The book serves as an academically sound introduction to the range of disciplines involved technical empirical and conceptual and will be of value to researchers in the areas of artificial intelligence psychology cognition and user machine interaction

Computational Techniques for Human Smile Analysis Hassan

Ugail,Ahmad Ali Asad Aldahoud,2019-04-17 In this book the authors discuss the recent developments in computational techniques for automated non invasive facial emotion detection and analysis with particular focus on the smile By way of applications they discuss how genuine and non genuine smiles can be inferred how gender is encoded in a smile and how it is possible to use the dynamics of a smile itself as a biometric feature It is often said that the face is a window to the soul Bearing a metaphor of this nature in mind one might find it intriguing to understand if any how the physical behavioural as well as emotional characteristics of a person could be decoded from the face itself With the increasing deductive power of machine learning techniques it is becoming plausible to address such questions through the development of appropriate computational frameworks Though there are as many as over twenty five categories of emotions one could express regardless of the ethnicity gender or social class across humanity there exist six common emotions namely happiness sadness surprise fear anger and disgust all of which can be inferred from facial expressions Of these facial expressions the smile is the most prominent in social interactions The smile bears important ramifications with beliefs such as it makes one more attractive less stressful in upsetting situations and employers tending to promote people who smile often Even pockets of scientific research appear to be forthcoming to validate such beliefs and claims e g the smile intensity observed in photographs positively correlates with longevity the ability to win a fight and whether a couple would stay married Thus it appears that many important personality traits are encoded in the smile itself Therefore the deployment of computer based algorithms for studying the human smiles in greater detail is a plausible avenue for which the authors have dedicated the discussions in this book

Development of Multimodal Interfaces: Active Listening and Synchrony Anna

Esposito,Nick Campbell,Carl Vogel,Amir Hussain,Anton Nijholt,2010-04-09 The themes of the papers presented in this book emphasize theoretical and practical issues for modelling human machine interaction ranging from the attempt in describing the spacing and orientation in co present interaction to the effort for developing multimodal interfaces collecting and analysing interaction data and emergent behaviour as well as analysing the use of nonverbal and pragmatic elements of exchanges implementing discourse control and virtual agents and using active listening in computer speech processing
