Factoring Humanity Robert J. Sawyer, 2003-11-21 A twenty first century scientist sacrifices her family life to decipher the strange signals coming from interstellar space messages that show her how to build an extraordinary machine that allows one to travel via the mind **Handbook of Space Engineering, Archaeology, and Heritage** Ann Darrin, Beth L. O'Leary, 2009-06-26 Some might think that the 27 thousand tons of material launched by earthlings into outer space is nothing more than floating piles of debris However when looking at these artifacts through the eyes of historians and anthropologists instead of celestial pollution they are seen as links to human history and heritage Space The New Frontier for Ar *The Science Fiction of Phyllis Gotlieb* Dominick Grace, 2015-01-26 Gotlieb is a writer central to the Canadian science fiction canon Though she has been called the queen of Canadian SF by Robert J Sawyer and though David Ketterer has suggested that she is Canadian SF Gotlieb has been largely overlooked by SF studies This book delves deeply into her body of work and traces her career in detail Offering close readings of Gotlieb s novels short stories including ones not reprinted since their initial appearances and SF related poetry this study explores Gotlieb s development as a writer and her characteristic themes The book also references her manuscripts when the differences between them and the published stories provide insights into her working methods The book enumerates and analyzes Gotlieb s innovative explorations of common SF tropes such as the superhuman human alien interaction and the galactic empire her prevalent thematic concerns e g reproduction colonization the mind body relationship the essence of humanity as well as her stylistically dense and literary approach to the genre *Mathematics in Postmodern American Fiction* Stuart J. Taylor, 2024-04-23 This book delivers an innovative critical approach to better understand U S fiction of the information age and argues that in the last eighty years fiction has become increasingly concerned with its representations of mathematical ideas images and practices In so doing this book provides a fuller transnational account of the place of mathematics in understanding mathematically informed novels Literature and science studies have acknowledged and situated historical points of cultural crossover by emphasising mathematics within this larger intellectual context and not as an unlikely and alien adjunct to post war culture this monograph clarifies how mathematically informed postmodern fictions work in a cognate fashion to other fields undergoing structuralist revolutions This is especially evident in fiction by the key mathematically literate Postmodern authors upon whom this study focuses namely Thomas Pynchon Don DeLillo and David Foster Wallace through which recent the technological revolutions facilitated by mathematics manifest in cultural discourse WWW Robert J.
