Secure and Trustworthy Service Composition Achim Brucker, Fabiano Dalpiaz, Paolo Giorgini, Per Håkon Meland, Erkuden Rios, 2014-11-26 The Future Internet envisions a move toward widespread use of services as a way of networked interaction. However, while the technologies for developing and deploying services are well established, methods for ensuring trust and security are fewer and less mature. Lack of trust and confidence in composed services and in their constituent parts is reckoned to be one of the significant factors limiting widespread uptake of service-oriented computing. This state-of-the-art survey illustrates the results of the Aniketos Secure and Trustworthy Composite Services project funded under the EU 7th Research Framework Programme. The papers included in the book describe the solutions developed during the 4-year project to establish and maintain trustworthiness and secure behavior in a constantly changing service environment. They provide service developers and providers with a secure service development framework that includes methods, tools, and security services supporting the design-time creation and run-time composition of secure dynamic services where both the services and the threats are evolving. The 16 chapters are organized in the following thematic sections: state-of-the-art of secure and trustworthy composite services; the Aniketos platform; design-time support framework; run-time support framework; and case studies and evaluation.

Aiming to Explain B. Timothy Heinmiller, Matthew A. Hennigar, 2022-06-29 Firearms policy has periodically dominated Canadian politics since the late 1960s. Compared to the United States, however, there is little scholarship on firearms policy to the neighbouring north. Using Canadian firearms policy, *Aiming to Explain* examines five prominent policy process theories employed during the period from the 1989 Montreal Massacre to the 2012 cancellation of the universal firearms registry. Throughout, B. Timothy Heinmiller and Matthew A. Hennigar present rigorous applications of rational choice, institutionalism, social constructivism, the advocacy coalition framework, the multiple streams framework, and punctuated equilibrium. The investigations draw on method-based best practices while also making use of a wide range of data collection and analysis techniques, including inferential statistics, descriptive statistics, process tracing, congruence analysis, and qualitative content analysis. The goal of *Aiming to Explain* is not to select a single best theory but to compare their relative strengths and weaknesses in an effort to direct future research and theoretical development efforts in the study of Canadian public policy.

Service-Learning Capacity Enhancement in Hong Kong Higher Education Grace Ngai, Daniel T.L. Shek, 2022-08-17 This book provides an in depth multi faceted look into capacity building for service learning using the case of the higher education landscape in Hong Kong Service learning has been proven to be an effective pedagogy for the holistic development of students as well as promotion of their well being It also attempts to promote the well being of the service recipients and the community While service learning is becoming increasingly popular in many higher educational institutions around the world the learning gains that can be attained from service learning are only as good as the learning experience allows and poorly developed or motivated service learning may potentially do adverse harm to students and the community This book reinforces the imperative to enhance the capacity of the institution teachers

students and community partners by exploring a diverse range of methods for achieving capacity building among different stakeholders. Examples of the methods explored include formal course based professional development, scale development, action research, and communities of practice. Furthermore, the book includes a series of detailed qualitative case studies that are aimed at embodying good practice, unpacking what matters from service learning. As a useful resource for scholars and educators who are passionate about holistic youth leadership development, this book is also relevant to researchers in the intersection between well-being and higher education.

Chemical Reactivity Savas Kaya, Laszlo von Szentpaly, Goncagul Serdaroglu, Lei Guo, 2023-05-15. The growth of technology for chemical assessment has led to great developments in the investigation of chemical reactivity in recent years, but key information is often dispersed across many different research fields. Combining both original principles and the cutting-edge theories used in chemical reactivity analysis, *Chemical Reactivity Volume 1* presents the latest developments in theoretical chemistry and its application for the assessment of chemical processes. Beginning with an exploration of different theories and principles relating to electronic structure and reactivity of confined electronic systems, the book goes on to highlight key information on such topics as Dyson orbitals, target ion overlaps, reaction fragility, magnetizability principles, and the Fukui function. Density Functional Theory is discussed in relation to numerous different principles and approaches, with further information on constrained methods and diabatic models, bonding evolution theory, orbital-based population analysis models, and charge transfer models. Quantum chemistry and QTAIM: Consolidating the knowledge of a global team of experts in the field, *Chemical Reactivity Volume 1: Theories and Principles* is a useful resource for both students and researchers interested in gaining greater understanding of the principles and theories underpinning chemical reactivity analysis. Provides readers with the key information needed to gain a good overview of contemporary chemical reactivity studies and a clear understanding of the theory behind state-of-the-art methods in the field. Highlights advances in the computational descriptions of reactivity, including reactivity in confined environments, conceptual density functional theory, and multi-reference quantum chemistry. Provides comprehensive coverage by consolidating the knowledge of many well-known researchers in the field from around the world.

Quality Physical Education Walter Ho, 2025-05-07. This book represents the culmination of a two-decade effort to describe, define, and measure quality physical education (QPE). Presenting in-depth research and analysis from 24 countries across five continents, it offers a truly comparative analysis that shines important new light on policy and practice in contemporary physical education. Opening with an introduction that explores the concept of quality in relation to education and that traces the history of the QPE project, the book then presents country-specific chapters that drill down into the evidence. Each chapter outlines the geographical, political, economic, cultural, and demographic background of that country and analyses the development of physical education, sport education, and school

based physical activity as well as the contemporary situation regarding equity teaching quality professional training and curriculum development Each chapter then offers an assessment of the eight factors that constitute the QPE index including skill development facilities accessibility cultural practices governmental input cognitive skill development and habituated behaviour With a global reach this book is an invaluable resource for policymakers curriculum coordinators administrators teachers and researchers looking to better understand the enablers and barriers to developing QPE and to develop evidence based strategies and interventions for promoting and implementing QPE
