and children feel hemmed in by the strictures of a curriculum which simply does not allow room for creativity to breathe. Unlock the chains, let the light in, and this is the kind of writing that will flow. This is the kind of intellectual and emotional growing that can transform young lives. Michael Morpurgo, Children's Laureate 2003-2005. What a splendid book. Michael Armstrong pays attention, thirty years of it, to the stories that children write. We get two for one: the children's own delightful and intriguing work, and I want to rush off and write some. Wally, age 5, stories of my own, and Michael Armstrong's intense interpretations. Allan Ahlberg. This is real learning at its best: teaching by example through painstaking scrutiny of the art of young writers. Absorbing, moving, enlightening, inspiring. Morag Styles, University of Cambridge. In *Children Writing Stories*, Michael Armstrong reveals the creative force of children's narrative imagination and shows how this develops through childhood. He provides a new and powerful understanding of the significance of narrative for children's intellectual growth and for learning and teaching. The book explores a series of real stories written by children between the ages of five and fifteen and traces the growth of literary consciousness from the dawn of written narrative in the kindergarten through the early years of schooling and on into adolescence. Each chapter opens with a story or stories which the author then goes on to examine in detail, so that the book may be seen as both a select anthology of children's stories and as a critical account of children's narrative practice. This original and provocative book will appeal to teachers, parents, students of education, and readers with an interest in literacy, children's writing, or narrative theory.

[The Quest for Meaning](#), 2009-01-01. *The Quest for Meaning: Teaching, Learning, and the Arts* presents a narrative arts-based approach to pedagogy and research in higher education. Through narratives of experience, the book offers revealing, poignant examples of the transformative power of the arts and of narrative inquiry in learners' lives and of the centrality of story in their ongoing quest for meaning. *The Quest for Meaning* will be valuable in a wide range of graduate and undergraduate settings. It provides a framework for the development of new pedagogies which integrate the theory and practice of narrative arts-based approaches to education. The work makes a contribution to the fields of narrative and arts-based inquiry and pedagogy, qualitative research methods, holistic and integrated studies, and self-directed inquiry. It will appeal to a range of audiences who are interested in this creative, integrative approach to education and who want to gain insights into how students learn from their own unique perspectives. Grounded in Dr Beattie's interconnected approach to research and pedagogy, the book begins with her own story of teaching, learning, research, and the arts. This provides the backdrop to an account of a collaborative pedagogy designed to enable students to conduct in-depth narrative inquiries into their lives and to learn how to do narrative arts-based research with others. The author provides insights into the practices and processes of solitary and collaborative inquiry and the interaction and integration that take place within the three kinds of dialogue she proposes: the dialogue with the self, the dialogue with others, and the dialogue between the dialogues. The book's other twelve narratives show from learners' unique perspectives how the creation and re-creation of their ways of knowing and being is a distinctively individual

process involving all aspects of their humanity Individually these narratives provide valuable glimpses into the challenges the joys the frustrations and emotionality and the important personal satisfactions involved in the processes of learning unlearning and re learning In their own voices these learners tell of the diverse ways in which they became more responsive to their own inner lives to the perspectives and understandings of others and to the creation of more meaningful narratives for their current and future lives Collectively the narratives highlight the importance of recognizing personal experience in settings of higher education They also present compelling evidence for acknowledging the significance of inquiry creativity imagination dialogue interaction and integration in enabling learners to bring the whole of their being to the learning process to the exploration of the stories by which they live and to the creation of new narratives for their future lives *Teaching Children* Diane D.
