

# How to spot a FAKE ID

Look for these security features on ID cards

Can be seen with the naked eye

Requires touch to detect

Hold card to view feature

Requires light source

## Fine-line or guilloche pattern

A pattern of continuously fine lines constructed by using two or more lines in overlapping bands that repeat a lac, web-like curve.

## Ghost image

Half-tone reproduction of the original image that is typically printed in the same area as, and behind, personal data.

## Laser engraving

Information that cannot be mechanically or chemically removed without surface damage to the card. Can be used for photos, characters, bar codes, OCR, etc.

## Laser perforation

Holes made with a laser beam to form images or objects. Image is visible when held up to a light source. It has tactile feel with conical holes that are larger at the entrance than exit.

## Overlapping data

Variable data, such as digitized signature, seal, or text that can be placed over another field such as a photo image. Both fields must be altered to make a fake.

## Overlay

An ultra-thin film or protective coating that may be applied to the surface of a card in place of a security laminate and which may contain optically variable features.

## Tactile feature

A feature that is apparent to touch or feel without the use of a special instrument. This could include texture, flexibility, or weight of the document.

## Transparent image

See-through, window-like feature visible from both sides of a document.

## Laser embossing

The unique use of a laser to emboss an image or data to rise only on one side of the card material.

## Rainbow printing

Must demonstrate a controlled exacting color shift subtly in a continuous linear fashion.

## Opacity mark

Similar to a watermark. It is a plastic that contains a unique translucent mark.

## Variable laser image

Laser-engraved image with tilting effect incorporated in plastic cards: images are engraved at different angles through an array of cylindrical lenses embossed into the surface of the card. Angle of view effects a change.
