

## CHAPTER 7

### SCOPE AND LIMITATION OF THE STUDY

#### Learning Objectives

At the end of the discussions, the learners shall be able to:

- Explain the scope and limitations of the research study
- Identify the scope and limitations of the research study

#### WHAT IS SCOPE OF STUDY SECTION?

The scope and limits of the study in terms of the *problem, population, respondents, sampling technique used, the research method, the instrument used, and the analysis are explained*. The implications of these limitations to the results, conclusions, and to the use of the findings are explained.

The Scope of study in the thesis or research paper is contains the explanation of what information or subject is being analyzed. It is followed by an explanation of the limitation of the research. Research usually limited in scope by sample size, time and geographic area. While the delimitation of study is the description of the scope of study. It will explain why definite aspects of a subject were chosen and why others were excluded. It also mention the research method used as well as the certain theories that applied to the data.

#### STATE THE STUDY DELIMITATIONS AND LIMITATIONS

Delimitations and limitations clarify the boundaries, exceptions, and reservations inherent in every study. The two concepts are different in that:

- **Delimitations** aim to narrow the scope of a study. For example, the scope may focus on *specific variables, specific participants, specific sites*, or narrowed to one type of research design (e.g., ethnography or experimental research).
- **Limitations**, however, aim to identify potential weaknesses of the study. For example, all *statistical procedures and research strategies*, such as surveys or grounded theory studies have limitations. In introductory discussions about these strategies, authors typically mention both their strengths and their weaknesses.

*Sample phrases that help express the scope of the study:*
