Grade 11 Business Study Scope 2014 November:

Structure, Agency and Biotechnology Aristeidis Panagiotou, 2017-07-03 Structure Agency and Biotechnology argues for the significance of sociological theory and highlights the insights it can offer to the study of agricultural biotechnology Cautioning against a simplistic reading of the GM controversy as merely a debate of science versus politics Aristeidis Panagiotou suggests that the discussion should be embedded in the wider social political economic and cultural contexts Structure Agency and Biotechnology assesses the 2012 Rothamsted GM wheat trials and proposes that the tension underlying GM technology should be resolved through sustained dialogue public involvement and broad scientific consensus

Corporate Carbon and Climate Accounting Stefan Schaltegger, Dimitar Zvezdov, Igor Alvarez Etxeberria, Maria Csutora, Edeltraud Günther, 2016-01-21 This volume is devoted to management accounting approaches for analyzing business benefits and costs of climate change It discusses future directions on carbon accounting performance measurement and reporting as well as links between climate accounting and business processes product and service development supply chain innovation economic successes and stakeholder relations Companies are increasingly called on to contribute to combatting climate change and also face the challenges presented by climate change related costs risks and benefits Risks can result from unpredictable weather conditions and government regulations such as the EU emission trading system and new building codes Climate change also offers numerous opportunities such as energy efficiency innovations and carbon neutral products and production Good management requires that carbon emissions are tracked and climate related costs risks and benefits are identified measured and assessed As such research addressing corporate accounting frameworks and tools is of increasing importance when it comes to managing these carbon and climate related issues

Coherence between Data Protection and Competition Law in Digital Markets Klaudia Majcher, 2023-10-09 In digital markets data protection and competition law affect each other in diverse and intricate ways Their entanglement has triggered a global debate on how these two areas of law should interact to effectively address new harms and ensure that the digital economy flourishes Coherence between Data Protection and Competition Law in Digital Markets offers a blueprint for bridging the disconnect between data protection and competition law and ensuring a coherent approach towards their enforcement in digital markets Specifically this book focuses on the evolution of data protection and competition law their underlying rationale their key features and common objectives and provides a series of examples to demonstrate how the same empirical phenomena in digital markets pose a common challenge to protecting personal data and promoting market competitiveness A panoply of theoretical and empirical commonalities between these two fields of law as this volume shows are barely mirrored in the legal enforcement policy and institutional approaches in the EU and beyond where the silo approach continues to prevail The ideas that Majcher puts forward for a more synergetic integration of data protection and competition law are anchored in the concept of sectional coherence This new coherence centred paradigm reimagines the interpretation and enforcement of data

protection and competition law as mutually cognizant and reciprocal allowing readers to explore in an innovative way the interface between these legal fields and identify positive interactions instead of merely addressing inconsistencies and tensions This book reflects on the conceptual practical institutional and constitutional implications of the transition towards coherence and the relevance of its findings for other jurisdictions **Big Data-Enabled Nursing** Connie W.
