Jacobs Publisher Open Access:

Open Access Peter Suber, 2012-07-20 A concise introduction to the basics of open access describing what it is and isn't and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work open access: digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

Digital Libraries: Universal and Ubiquitous Access to Information George Buchanan, Masood Masoodian, Sally Jo Cunningham, 2008-11-14 This book constitutes the refereed proceedings of the 11th International Conference on Asian Digital Libraries (ICADL 2008) held in Bali, Indonesia, in December 2008. The objective of this conference series is to provide a forum for presentation of high quality research in the field of digital libraries. ICADL 2008 provided an opportunity for digital libraries researchers and practitioners in the Asia Pacific area and beyond to gather to explore ideas, exchange and share experiences, and further build the research network in this region. ICADL 2008 was a truly international event with presenters from 21 countries. A total of 63 papers were accepted for inclusion in the proceedings: 30 full papers, 20 short papers, and extended abstracts of 13 posters. Submissions were subject to a rigorous blind peer review process. The research topics cover the spectrum of digital libraries, including multimedia, digital libraries usability, and evaluation, information retrieval, ontologies, social tagging, metadata issues, multi- and cross-language retrieval, digital preservation, scholarly publishing, and communities, and more. Additionally, three tutorials were offered in association with the conference by Andreas Rauber (Vienna University of Technology), David Bainbridge (University of Waikato), and George Buchanan (Swansea University).
