It provides new data, policy evaluation and offers national and regional perspectives. The core research questions are the effect of public investment in the context of macroeconomic disequilibrium and how it is possible to finance capital accumulation in the present and future conditions of mounting public sector debt. The contributors reveal that there is now a convincing case for public investment as an essential driver of convergence and growth in Europe. However, a new international and inter generational fiscal pact to frame a more optimistic view of the role of government is needed. This book explores how public investment matters for growth, how fiscal conditions may support investment and the role EU regional policy can have in terms of structural change and investment needs. *Public Investment, Growth and Fiscal Constraints* provides new data analyses on the EU New Member States in Central and Eastern
