we need above all to overcome the left right divide so much taken for granted today and promote financial literacy to young people His contribution to the Transformation and Innovation Series claims that global finance has brought us to the limits of what mechanistic economic explanations can capture New ideas and above all new instruments are needed so that innovation can shift from its dexterous exploitation of inefficiencies and turn its attention instead to fresh initiative Finance at the Threshold is essential reading for academics and practitioners concerned with financial and economic policy and needing to develop a sense of the history thus understanding the forward prospects for global finance
