the present book argues against the modernization theory and determinism that would anticipate a similar developmental path globally and shows that the relationship between law and economic development is contingent. Therefrom this study weighs in the law and development debate and breaks a perception of static law in the economy by rejecting the conventional perception of established legal institutions as a precondition of modernity. Hence this book could appeal to legal scholars and sociologists interested in reevaluating western theories of free economy and its relationships to the law. In addition, scholars interested in research methodology would find the perspective of paradigm shifts in interpreting China's transformations a helpful analytical framework in research. Moreover, policymakers and legislators concerned about the characteristics of law for economic results would also find the book useful.
