disciplinary procedures and proclivity to discipline vary by both student and teacher gender Likewise a teacher s perception of student characteristics and abilities appear to systematically vary by gender Other studies find male students benefit at the expense of female students in the amount and quality of interaction received from teachers of both genders What has yet to be determined is how these differences in discipline perceptions of student ability and interactions between student and teacher influence student outcomes as measured by standardized exams      *Experiments and Innovations in Education* ,1972
