

HERTZSPRUNG-RUSSELL DIAGRAMS

Early 20th century: astronomers discovered correlation between luminosity and surface temperature of stars:

$$\uparrow T = \uparrow L$$

HERTZSPRUNG-RUSSELL DIAGRAM

visually splits the types of stars

Not a graph, a chart;
therefore, a best-fit line is meaningless.

$\uparrow m$ moving from R to L

Note axes are not linear

Note: $L_{\text{sun}} = 3.9 \times 10^{26} \text{ W}$

Teaching Big History Richard B. Simon, 2014-12-23 Big History is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history Weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a curriculum around it Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History The book includes teaching materials examples and detailed sample exercises This book is also an engaging first hand account of how a group of professors built an entire Big History general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike

Thinking Physics for Teaching C. Bernardini, C. Tarsitani, M. Vicentini, 2012-12-06 The research in Physics Education has to do with the search of solutions to the complex problem of how to improve the learning and teaching of physics The complexity of the problem lies in the different fields of knowledge that need to be considered in the research In fact besides the disciplinary knowledge in physics which must be considered from the conceptual the historical and the epistemological framework one has to take into account some basic knowledge in the context of psychology and the cognitive sciences for the general and contextual aspects of learning and some basic knowledge in education and communication for what concerns teaching skills and strategies Looking back at the historical development of the research one may recognize that the complexity of the endeavour was not clear at first but became clear in its development which shifted the focus of the research in the course of time from physics to learning to teaching We may say that the research started more than 30 years ago with a focus on disciplinary knowledge Physicists in different parts of the western world after

research work in some field of physics decided to concentrate on the didactical communication of physical knowledge

Pedagogical and Curricular Thinking of Professional Astronomers Teaching the Hertzsprung-Russell Diagram in Introductory Astronomy Courses for Non-Science Majors ,2009 This qualitative study explores the pedagogical and curricular thinking of five professional astronomers faculty at a university about teaching the Hertzsprung Russell diagram in introductory astronomy courses for non science majors Data sources for this study included two semi structured interviews per participant in which they were asked about teaching the Hertzsprung Russell diagram as well as about the introductory course in general In addition participants were asked to complete four cognitive tasks the creation of a lesson plan a concept map on how they would like their students to think about the Hertzsprung Russell diagram at the end of the course a Pathfinder network rating task and responding to stereotypical student statements regarding the Hertzsprung Russell diagram The data was analyzed using a case study approach followed by a discussion of themes that emerged from the data Results indicate that participants had primarily affect and process goals for the course rather than content goals In addition they wanted students to view the HR diagram as a part of a flow chart where input physics both observed and inferred properties of stars leads to the construction of the HR diagram which in turn is used to make inferences about stellar evolution Participants identified several student difficulties with the HR diagram among which interpreting a graph was the

most pertinent In several stereotypical student statements participants responded using the exact same analogies to explain the concepts to the students This may be indicative of some underlying pedagogical content knowledge

The Position of Variable Stars in the Hertzsprung-Russell Diagram ,1965 [A Few of Our Favorite Things](#) Patricia D. Morrell,Kate Popejoy,2014-11-04 We are all familiar with the expression teachers bag of tricks It is fairly easy for K 12 teachers to do a quick web search scan library shelves and browse through journals to provide them with numerous lessons and ideas to keep their bags filled Science teacher educators need to not only provide preservice teachers with resources to help them fill their bags but also include crucial theory and pedagogy what constitutes minds on lessons not merely hands on activities But where do we science methods instructors find ideas to put in our bag of tricks to help us with the pedagogy we teach and model These kinds of teaching ideas are not so easy to find using the internet or even science methods textbooks This book is a collection of some favorite teaching ideas from science teacher educators from across the United States and abroad This book is NOT a collection of teaching ideas about specific science content This book IS a set of activities that help us prepare our preservice science teachers in the areas of Constructivism Conceptual Change Nature of Science Integration including Technology Integration Scientific Inquiry Engineering Design and Diversity Differentiation Each section starts with a brief overview of the topic and an introduction to the activities included on the theme The individual activities include step by step instructions modifications extensions references and additional readings to help you easily and fully implement the idea in your own classroom These ideas are a few of our favorites we hope they will become some of yours as well
