Casey J. Bedgood, 2023-05-19 Currently change is the new normal As change grows so does risk But how will leaders understand the risk if they don't measure it In short they won't The reality is that ignorance is never bliss What leaders and

their organizations don't know will eventually impact them and their customers. Thus situational awareness, forethought and preparation are now key competencies for leaders to survive in high risk environments. In this book readers will learn the basics of leadership, time management, the disruptability quotient, the leadership canary and why it's just as important to leaders as it was to coal miners and the slippery slope of change management. Do we improve change or model the current state signals of leadership maturity and false positives? Mastering the art of organizational knowledge, the pearls and pitfalls of leadership rebranding and the risk of non-utilized talent. Why aren't current leaders required to undergo storm proofing from an operational perspective? As many of us experienced in various academic programs, the main foci are technical skills in management, organizational theory, data analysis and many of the traditional leadership training courses. But what happens when a leadership storm appears, such as an unprecedented pandemic or supply chain crisis or talent gaps where workers are not available to complete the basic services humanity relies on daily? Most leaders were not and are not prepared for today's storms. The result is reactive leadership, higher than expected risk propositions and disruptive transformations that force leaders from their perches to find the next best role their skillsets will buy. This book is for leaders and professionals who are currently or will be leading teams, divisions and organizations. Its purpose is to provide practical guidance on how leaders can stormproof their portfolios. Thus they will be able to survive, thrive in and outlast high risk leadership storms that will overwhelm their less prepared peers.
