 Rebecca Rupp,1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high
 school level I See What You Mean Steve Moline,2023-10-10 Some educators may view diagrams pictures and charts as
 nice add on tools for students who are visual thinkers But Steve Moline sees visual literacy as fundamental to learning and to
 what it means to be human In Moline s view we are all bilingual Our second language which we do not speak but which we
 read and write every day is visual From reading maps to decoding icons to using concept webs visual literacy is critical to
 success in today s world The first edition of I See What You Mean published in 1995 was one of the first books for teachers to
 outline practical strategies for improving students visual literacy In this new and substantially revised edition Steve
 continues his pioneering role by including dozens of new examples of a wide range of visual texts from time maps and
 exploded diagrams to digital tools like smartphone apps and tactile texts In addition to the new chapters and nearly 200
 illustrations Steve has reorganized the book in a useful teaching sequence moving from simple to complex texts In one
 research strategy called recomposing Steve shows how to summarize paragraphs of information not as a heap of interesting
 facts but as a diagram The diagram can then work as a framework for students to follow when writing an essay This
 overcomes the teacher s problem of cut and paste essays and by following their own diagram summary students have an
 answer to their familiar questions Where do I start What do I write next Just the Facts: Earth and Space Science, Grades
4 - 6 Sinsel,2007-06-11 Engage scientists in grades 4 6 and prepare them for standardized tests using Just the Facts Earth
