The second decade of the twenty first century has witnessed a surging interest in personalized medicine with the concomitant promise to enable more

precise diagnosis and treatment of disease and illness based upon an individual's unique genetic makeup. In this book, my goal is to contribute to a growing body of literature on personalized medicine by tracing and analyzing how this field has blossomed in Asia. In so doing, I aim to illustrate how various social and economic forces shape the co-production of science and social order in global contexts. This book shows that there are inextricable transnational linkages between developing and developed countries and also provides a theoretically guided and empirically grounded understanding of the formation and usage of particular racial and ethnic human taxonomies in local, national, and transnational settings. The Art of Compassionate Business Bruno R. Cignacco, 2023-12-01. There are several well-ingrained assumptions regarding the dynamics of work and business activities which can be refuted. Some examples of these widespread assumptions in business and work environments are: employees being viewed as commodities, competitors perceived as threats, companies' resources seen as limited, and customers perceived as scarce and difficult. All this leads to the question: Is there a way to perform business activities more humanely? The second edition of this book challenges the reader to change the way they perform in business situations and become more focused on the human aspects of business activities. The users of this knowledge and those affected by them will undergo a profound transformation in the way they perform business activities. They will benefit from gradually testing and implementing the guidelines conveyed in this book both in the business environment and in the workplace. When readers put these principles into practice, positive ripple effects are bound to affect other stakeholders of the organisation they work for or own. The author has refreshed all the concepts and examples introduced in the first edition, which include aspects related to mission and vision, passion, business mindset, organisational learning, improvement of business conversations, use of constructive criticism, and betterment of relationships with the most relevant stakeholders: customers, suppliers, intermediaries, community, employees, etc. The author also includes a discussion of creativity and the innovation process, as well as other relevant aspects related to a healthy business environment and provides various real-life examples of companies which have adopted a loving

attitude towards their stakeholders which has become so important in the current business environment **Plant**

Microtechniques and Protocols Edward Chee Tak Yeung, Claudio Stasolla, Michael John Sumner, Bing Quan

Huang, 2015-09-19 A proper understanding of the structural organization of the plant body is essential to any study in plant biology. Experimental studies in vivo and in situ will lead to structural, physiological and cellular changes of the experimental material. To study macroscopic and microscopic changes, different histological methods and microtechniques can be used as they provide valuable information of the experimental system. In addition, the observed structural changes allow investigators to set hypothesis for further studies based on one's own observation. Thus, proper selection and utilization of microtechniques are a must for the success of a research program. At present, an up-to-date collection of protocols are not readily available in the literature. The latest work in plant microtechniques was published in 1999 by Ruzin, but many others are no longer in print, e.g. Jensen 1964, O'Brien and McCully 1981. Furthermore, a majority of published works focus on techniques related to general processing and staining procedures. A comprehensive treatment that encompasses broader applications of microtechniques to other disciplines is lacking, e.g. archeology, wood science, etc. There is a need to create a comprehensive volume of botanical methods and protocols which includes traditional and novel techniques that can be used by researchers in plant science and investigators in other disciplines that require plant microtechniques in their research and teaching. This book covers a wide variety of applications and brings them up-to-date to make them understandable and relevant, especially to students using the methods for the first time. It is our intention to create a useful reference for plant histology and related methods that will serve as a foundation for plant scholars, researchers and teachers in the plant sciences. Wasserman, Debra Bakerjian, Sunny Linnebur, Sharon Brangman, Matteo

Cesari, Sonja Rosen, 2024-02-19 Both volumes sold as a combined set for a one time purchase Older adults represent the most rapidly growing demographic in the U S and in many developed countries around the world The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer reviewed literature Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars year in the US How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance According to the Institute of Medicine physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life It is essential that physicians nurse practitioners physician assistants pharmacists social workers and other health care professionals all be knowledgeable about the geriatric approach to care Geriatric medicine varies from most other fields in medicine While many specialties function on the basis of evidence based literature geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants Geriatricians are used to caring for 90 year olds with multiple chronic illnesses Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care Practicing geriatric medicine requires the ability to see patterns But it goes one step further as the rules are constantly in flux Every patient is an individual with particular needs and goals In order to provide true person centered care to older adults one has to incorporate these factors into the decision making process The proposed handbook is designed to present a comprehensive and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine
