Revue internationale de la documentation ,1962 **Handbook of Laboratory Health and Safety Measures** S.B. Pal,2013-03-14 During the past two decades many books governmental reports and regulations on safety measures against chemicals fire microbiological and radioactive hazards in laboratories have been published from various countries These topics have also been briefly discussed in books on laboratory planning and management The application of various scientific instruments based on

different ionizing and non ionizing radiations have brought new safety problems to the laboratory workers of today irrespective of their scientific disciplines be they medicine natural or life sciences However no comprehensive laboratory handbook dealing with all these hazards some of which are recently introduced had so far been available in a single volume Therefore it was thought worthwhile to publish this Handbook on safety and health measures for laboratories with contributions from several experts on these subjects As this second edition of the Handbook like the first edition is a multiauthor volume some duplication in content among chapters is unavoidable in order to maintain the context of a chapter as well as make each chapter complete An attempt has also been made to maintain the central theme which is how to work in a laboratory with maximum possible environmental safety
