areas relative to similar studies of larger organisms Insects are also important bioindicators of the health of ecosystems In a small space and with very little cost colonies of insects can be raised in classrooms for use in behavioral and physiological studies The purpose of this book is to explain how to build and use insect collecting and rearing devices and through explanations of the various techniques stimulate educators to explore the study of insects in their classrooms Insects are often given little consideration with regard to humane handling practices Please remember that insects are living creatures and as such are entitled to the same treatment as other living creatures Teachers should remember that students look to them for clues to the proper way of behaving in new situations When collecting and working in the field educators should teach students to respect the environment Do not collect more organisms than needed treat all of the organisms you collect with care and try not to leave signs of your presence in an area by returning rocks logs etc to their original locations If you must kill animals you ve collected do so quickly and humanely
