Linux Essentials for Cybersecurity Lab Manual William Rothwell, 2018-10-09 This lab manual accompanies the textbook *Linux Essentials for Cybersecurity*, which teaches people how to use Linux systems and ensures that the Linux systems they work on are as secure as possible. To really become a Linux cybersecurity expert, you need practice. In this book, there are three different types of labs to practice your skills: Labs in which you are presented with a short problem that requires only a single operation to complete; Labs that are more complex but in which we provide you with a guide to perform each step one at a time; Scenario labs in which you are asked to solve a problem entirely on your own. These labs are designed to pose a greater challenge. No matter the type, these labs are designed to be performed on live Linux systems to give you hands-on practice and develop critical thinking and complex problem-solving skills.
