Locate the G150RF in an area and at a height where it is convenient for user operation. The G150RF must be at least 10 feet from the control panel to ensure proper operation of the RF receiver. Perform the following steps to install the G150RF:

1. Push the two case release straps at the bottom of the keypad with the blade of a medium screwdriver (this will push in the release straps), then pull that side of the case back away. Insert the screwdriver in the side of the keypad (between the front and back case) and gently twist to release the side locking tabs. Repeat for the other side. Refer to Figure 1 for location of the case back release straps and locking tabs.
2. Route the wiring from the control panel through the opening in the case back. (See the control panel's instructions for proper wire run lengths.)
3. Mount the case back directly to a wall or electrical gang box.
4. Connect the power and data wires from the control panel to the terminals on the E100KF as indicated in the wiring table adjacent to Figure 2.

5. Connect the wires for the relay output (if used) to the terminals on the 6150RP's PC board.
6. Reattach the keypad to its case back.

Note: Upon power-up or exit of the Program Mode, the 4-digit alternately flashes "Ad" and the 2-digit keypad address and the 2-digit receiver address on the display. Press any key to display the system status.
