

Hold the piston rod with the end of a special strap wrench, illustrated on page 10, and disassemble the joint end. If the strap wrench slips, sprinkle a little kerosene on the belt.

NOTE: The strap wrench can be obtained through your John Deere dealer.

Piston seal horns have installed at the factory with "Lentor" sealing compound to prevent them

from coming loose during operation. If the seal end cannot be removed in the normal manner, apply pressure to the piston rod with the strap wrench, and heat the rod end until the seal is broken.

CAUTION: Do not heat the rod end more than necessary. Excessive heat may damage the piston rod.
