Architectural Coordination of Enterprise Transformation Henderik A. Proper,Robert Winter,Stephan Aier,Sybren de Kinderen,2018-04-05 Architectural coordination of enterprise transformation ACET integrates and aggregates local information and provides different viewpoints such as financial structural or skill perspectives to the respective stakeholder

groups with the aim of creating a consensus and shared understanding of an enterprise transformation among the stakeholders. Its core purpose is to inform decision makers with both local and enterprise wide concerns so that the overall transformation goals can be successfully pursued i.e. reducing inconsistencies and including local decisions in the overarching goals. This book consists of three major parts framed by an introduction and a summary. To enable readers to gain a better understanding of the issues involved in real world enterprise transformations as well as the possible role of architectural coordination and the associated challenges. Part I provides an analysis of status quo of corporate ACET practice. Part II then continues with an exploration of the challenges facing ACET from a theoretical perspective. Based on these challenges, Part III then presents a collection of components for a possible design theory for ACET. Instead of an integrated method, this collection of components constitutes method fragments that can be arranged in different ways depending on the perspective taken, the actual enterprise architecture management approach, the enterprise transformation type and the transformation's context.

Business Intelligence and Agile Methodologies for Knowledge-Based Organizations: Cross-Disciplinary Applications Rahman El Sheikh, Asim Abdel, Alnoukari, Mouhib, 2011-09-30. Business intelligence applications are of vital importance as they help organizations manage, develop and communicate intangible assets such as information and knowledge. Organizations that have undertaken business intelligence initiatives have benefited from increases in revenue as well as significant cost savings. *Business Intelligence and Agile Methodologies for Knowledge Based Organizations: Cross Disciplinary Applications* highlights the marriage between business intelligence and knowledge management through the use of agile methodologies. Through its fifteen chapters, this book offers perspectives on the integration between process modeling, agile methodologies, business intelligence, knowledge management and strategic management.

Building a Competitive Public Sector with Knowledge Management Strategy Al-Bastaki, Yousif, 2013-08-31. Organizational strategies in the public sector are constantly changing and growing. In order for organizations to remain successful and competitive, they must ensure that the stream of knowledge is managed effectively. *Building a Competitive Public Sector with Knowledge Management Strategy* explores different practices and theories of knowledge management, providing an efficient way of sustaining knowledge to improve organizational learning and enhance company performance. By intelligently analyzing current research, this publication is beneficial to managers, practitioners and researchers interested in increasing their knowledge management strategies in the public sector.
