Laverty Pathology Collection Manual:

A Manual of Morphometry in Diagnostic Pathology J.P. Baak, J. A. Oort, 2012-12-06 J Oort and J P A Baak This manual is written by pathologists and is meant for pathologists It deals with a subject that became especially popular in pathology at the end of the last decade morphometry Morphometry is defined as the quantitative description of a structure Weibel 1969 This structure may be both of macroscopic and micro scopic size Strictly the size of an organ is a morphometric feature This type of morphometry has long been in use in pathology Examples of this type in diagnostic pathology have been given by Roesle and Roulet 1932 In this manual however the term morphometry is used in its re stricted microscopic meaning i e the quantitative description of micro scopic images and features The quantitative analysis of microscopic pictures has for a long time been subordinated to the qualitative description This may partly have been caused by the preference of the human mind for pattern recognition rather than quantitative appraisal which leads to judgements based on impressions subconsciously tested against the observer's mental image of the normal pattern Another cause may have been the time consuming difficulties of collecting and computing quantitative information During the past decades the usefulness of quantitative methods in histo and cytopathology has been stressed for many different subjects In addition minicomputers have become widely available and are becoming increasingly inexpensive the more so since the introduction of micro computers

Manual of Drug and Alcohol Abuse A. Arif, J. Westermeyer, 2012-12-06 During the last few centuries and particularly in recent decades problems resulting from the excessive use of drugs and alcohol have spread virtually as an epidemic to every country in the world and to almost every community Abuse of alcohol and drugs is related to numerous other health problems such as the spread of acquired immune deficiency syndrome AIDS on all continents Health and social services today cannot afford to ignore this crisis since it affects all levels of society and manifests itself in diverse health and social problems In recent years the World Health Organization has received numerous requests for training material for physicians in this field This manual therefore meets an urgent need The availability of new data and the dearth of suitable textbooks have made its preparation mandatory The influence of sociocultural factors on drug dependence and alcohol related problems on their cause development and consequences as well as on their treatment and prevention has been taken into account in the preparation of this manual in order to ensure that its usefulness is not limited to one country or region It has been prepared primarily for the teaching of physicians and medical students although much of it is relevant to the training of nurses midwives health educators primary care workers medical social workers counselors and psychologists In fact suggestions have been included for adapting the manual for use in the training of such varied groups of students
