P. G. McHugh, 2011-08-18 Aboriginal title represents one of the most remarkable and controversial legal developments in the common law world of the late twentieth century Overnight it changed the legal position of indigenous peoples The common law doctrine gave sudden substance to the tribes claims to justiciable property rights over their traditional lands catapulting these up the national agenda and jolting them out of a previous culture of governmental inattention In a series of breakthrough cases national courts adopted the argument developed first in western Canada and then New Zealand and Australia by a handful of influential scholars By the beginning of the millennium the doctrine had spread to Malaysia Belize southern Africa and had a profound impact upon the rapid development of international law of indigenous peoples rights This book is a history of this doctrine and the explosion of intellectual activity arising from this inrush of legalism into the tribes relations with the Anglo settler state The author is one of the key scholars involved from the doctrine s appearance in the early 1980s as an exhortation to the courts and a figure who has both witnessed and contributed to its acceptance and subsequent pattern of development He looks critically at the early conceptualisation of the doctrine its doctrinal elaboration in Canada and Australia the busiest jurisdictions through a proprietary paradigm located primarily and constrictively inside adjudicative processes He also considers the issues of interdisciplinary thought and practice arising from national legal systems recognition of aboriginal land rights including the emergent and associated themes of self determination that surfaced more overtly during the 1990s and after The doctrine made modern legal history and it is still making it **The Human Rights of Children**

Michael Freeman, 2022-03-16 For decades Professor Michael Freeman has without doubt been one of the world s most influential scholars in international children s rights His scholarship has been at the forefront of the field and has helped shape many of the developments within it This collection offers the reader a thought provoking snapshot of some of his most seminal essays written and or published

over the past 30 years Together they highlight above all the interdisciplinary nature of the issues he discusses Legal doctrinal questions that make the case for recognising that children have rights are of course discussed But aspects of moral and political philosophy are dealt with as well in addition to among other other disciplines history theology psychology and anthropology **Principles of Cybercrime** Jonathan Clough,2010-05-13 A comprehensive doctrinal analysis of cybercrime laws in four major common law jurisdictions Australia Canada the UK and the US *Resources in Education* ,1986-10

Legal Theory of International Arbitration Emmanuel Gaillard,2010-05-03 Review excerpts from the book on Scribd International arbitration readily lends itself to a legal theory analysis The fundamentally philosophical notions of autonomy and freedom are at the heart of its field of study Similarly essential are the questions of legitimacy raised by the parties freedom to favor a private form of dispute resolution over national courts to choose their judges to tailor the procedure and to choose the applicable rules of law and by the arbitrators freedom to determine their own jurisdiction to shape the conduct of the proceedings and to choose the rules applicable to the dispute The present work based on a Course given at The Hague Academy of International Law in the Summer 2007 identifies the philosophical postulates that underlie this field of study and shows their profound coherence and the practical consequences that follow from these postulates in the resolution of international disputes **Todd & Wilson's Textbook on Trusts** Sarah Wilson,Paul Todd,2007 Focused on the key themes of an undergraduate course in trusts and with an analytical approach to the subject this book has been thoroughly updated and re worked to enhance accessibility whilst stimulating thought and insight for students Complex issues are explained clearly but without over simplification in this comprehensive account of trusts law which mirrors the focus of trusts teaching in universities and seeks to engage students critically through real life issues key scholarship and theoretical considerations To further help students excel in this subject expanded further reading sections and end of chapter questions are included alongside analysis of selected readings to guide the interested reader to relevant sources and ideas Real life examples of the application of the law of trusts are highlighted throughout Alongside reference to the latest scholarship in trusts consideration of theoretical perspectives has been expanded to provide a fresh and stimulating exposition Online Resource Centre The Online Resource Centre provides updates web links essay questions and answer guidance and summaries of selected further reading *New Perspectives on Land Registration* Amy Goymour,Stephen Watterson,Martin

Dixon,2018-02-08 The Land Registration Act 2002 has been in force for almost fifteen years When enacted the legislation which replaced the Land Registration Act 1925 was intended to offer a clear and lasting framework for the registration of title to land in England and Wales However perhaps confounding the hopes of its drafters the legislation s interpretation and application has since generated many unanticipated problems which demand attention In this book s twenty chapters leading land law scholars Law Commissioners past and present judges and Registry lawyers unpick key technical controversies and expose underlying theoretical and policy concerns Core issues addressed in these chapters include the legitimate ambitions

of registration regimes the nature and security of title afforded by registration the resolution of priority disputes affecting registered titles the relationship between the general law and the registration regime and new challenges presented by modern technological developments

Towards a European Unfair Competition Law Rogier W. De Vrey, 2006 The main aim of this book is to discuss the state of unfair competition law in the European Union In this respect the various efforts that have been made in the past to come to harmonization of this area of law and the reasons that they were only partially successful are reviewed In addition the International and European regulations that refer to unfair competition like e g the Paris Convention the TRIPs and the recent 2004 Unfair Commercial Practices Directive are discussed Also an overview is given of the unfair competition laws in the United Kingdom Germany and the Netherlands with respect to the problem areas of slavish imitation misleading advertising denigrating one's competitor trade secrets and finally misappropriation of valuable trade assets Unfair competition law is traditionally considered part of intellectual property law

Not only the relation of unfair competition law to intellectual property laws are therefore part of the discussion but also the areas of consumer protection law since unfair competition law is partly orientated towards consumer protection and competition as an economic concept is the topic of thorough review **Land Law** Ben McFarlane, Nicholas Hopkins, Sarah Nield, 2015 An authoritative course text designed to provide a standalone resource for students It contains a blend of carefully selected key cases legislation and academic debate linked by substantial author commentary **West Virginia Code** West Virginia, 1923 Poole's Textbook on Contract Law Robert Merkin QC, Robert M.
