Lcc Ing Summary For April 2014:

Life-cycle Cost Approach for Management of Environmental Resources V. Ratna Reddy, Mathew Kurian, Reza Ardakanian, 2014-08-22 This book demonstrates the application of Life cycle Cost Approach LCCA in the management of infrastructure and other investment projects in the context of developing countries The main goal is to identify potential opportunities for the adoption LCCA in developing countries with the help of case studies and best practices The editors observe that developing countries are plagued with poor and fluctuating service delivery which affords low or no priority for environmental protection They seek to instill at the policy making level an understanding of why life cycle cost assessment is central to achieving the goals of sustainable development as well as sustainable service delivery and to influence the behavior of sector stakeholders The editors examine the evolution of LCCA from a project appraisal tool to a more comprehensive method of incorporating sustainable development aspects in a variety of sectors By providing a compendium of concepts tools and practical experiences it seeks to broaden the application of LCCA which is often limited to specific phases of the life cycle with little or no weight given to environmental aspects The aim of the book is to mainstream LCCA into governance processes at institutional levels from local to national in order to increase the ability and willingness of decision makers both users and those involved in service planning budgeting and delivery to reach better informed and more relevant choices among different types and levels of products and services **The Report: Kenya 2014** Oxford Business Group, 2014-11-13 The country has a strong private sector and received encouraging forecasts of new oil gas and water reserves which if harnessed appropriately bode well for future growth While a pending international court case resulting from prior elections provoked a measure of uncertainty the country's medium to long term economic outlook is robust With over 40% of the population under the age of 15 Kenya stands to benefit from a significant demographic dividend provided that sufficient jobs can be found when this population bulge enters the workforce The country has a reasonably sized industrial base competitive infrastructure and a large agricultural sector all of which offer opportunities for capital intensive investment *The Airline Industry - A Comprehensive Overview* John Frankie O'Connell, 2025-09-30 In recent years airlines have faced unprecedented financial and operational uncertainties not only in the wake of COVID 19 but across the industry Their responses provide valuable lessons for the future for airlines for related industries and for all sectors that find unexpected upheaval suddenly in their path As a truly global business the airline industry offers countless lessons in navigating uncertainty and the necessity of continual business transformation *The Airline Industry A Comprehensive Overview Dynamic Trends and Transformations* is an up to date state of the nation perspective on the airline industry Its dedicated and detailed focus on airlines makes the book an invaluable tool in deciphering how airlines have been run and managed to date and provides a roadmap for the future evolution of the industry The author has interviewed countless airline and related industry professionals in their respective fields of expertise which adds layers of real world insight to every

chapter Written in a lively and accessible style that will appeal to readers whether they are in academia or the airline industry The Airline Industry A Comprehensive Overview Dynamic Trends and Transformations is essential reading for airline employees and undergraduate and postgraduate students and a vital point of reference for lecturers and researchers economists and business analysts looking for a thorough and commercial guide to the airline industry The Airline Revolution Gordon Mills,2016-07-15 When starting new airlines in response to government deregulation entrepreneurs in the U S and Europe reduced some traditional service qualities to reduce costs concentrated on non stop services between city pairs not already so connected improved on time performance and offered low fares to win leisure travelers from the incumbents and to encourage more travel In recent developments some of the new airlines have offered optional extras at higher fares to attract business travelers and entered major routes alongside the legacy carriers Within both the U S and Europe deregulation removed most geographical barriers to expansion by short haul airlines Later limited deregulation spread to other world regions where many short haul routes connect city pairs in different countries and where governments have retained traditional two country mechanisms restricting who may fly To gain access to domestic routes in other countries some new airlines are setting up affiliate companies in neighboring countries with each company legally controlled in the country of domicile With air travel growing strongly especially in Asia a common result is intense but potentially short lived competition on major routes The recent developments give clear signposts to likely mid term outcomes and make this an opportune time to report on the new airline scene The Airline Revolution will provide valuable economic analysis of this climate to students airline professionals advancing to senior positions public servants and others who provide advice to governments *Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision* Robby Caspeelee,Luc Taerwe,Dan Frangopol,2018-10-31 This volume contains the papers presented at IALCCE2018 the Sixth International Symposium on Life Cycle Civil Engineering IALCCE2018 held in Ghent Belgium October 28 31 2018 It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R Khan lecture 8 keynote lectures and 390 technical papers from all over the world Contributions relate to design inspection assessment maintenance or optimization in the framework of life cycle analysis of civil engineering structures and infrastructure systems Life cycle aspects that are developed and discussed range from structural safety and durability to sustainability serviceability robustness and resilience Applications relate to buildings bridges and viaducts highways and runways tunnels and underground structures off shore and marine structures dams and hydraulic structures prefabricated design infrastructure systems etc During the IALCCE2018 conference a particular focus is put on the cross fertilization between different sub areas of expertise and the development of an overall vision for life cycle analysis in civil engineering The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life cycle analysis and assessment in civil engineering including researchers practising engineers consultants contractors decision makers and representatives from local authorities

Multi-criteria Decision Analysis for Supporting the Selection of Engineering Materials in Product Design Ali Jahan, Kevin L Edwards, Marjan Bahraminasab, 2016-02-17 Multi criteria Decision Analysis for Supporting the Selection of Engineering Materials in Product Design Second Edition provides readers with tactics they can use to optimally select materials to satisfy complex design problems when they are faced with the vast range of materials available Current approaches to materials selection range from the use of intuition and experience to more formalized computer based methods such as electronic databases with search engines to facilitate the materials selection process Recently multi criteria decision making MCDM methods have been applied to materials selection demonstrating significant capability for tackling complex design problems This book describes the rapidly growing field of MCDM and its application to materials selection It aids readers in producing successful designs by improving the decision making process This new edition updates and expands previous key topics including new chapters on materials selection in the context of design problem solving and multiple objective decision making also presenting a significant amount of additional case studies that will aid in the learning process Describes the advantages of Quality Function Deployment QFD in the materials selection process through different case studies Presents a methodology for multi objective material design optimization that employs Design of Experiments coupled with Finite Element Analysis Supplements existing quantitative methods of materials selection by allowing simultaneous consideration of design attributes component configurations and types of material Provides a case study for simultaneous materials selection and geometrical optimization processes
