critics hailing the rise of Quality series such as Mad Men and 30 Rock Likewise DVDs and DVRs web video HDTV and mobile devices have shifted the longstanding conception of television as a household appliance toward a new understanding of TV as a sophisticated high tech gadget Newman and Levine argue that television's growing prestige emerges alongside the convergence of media at technological industrial and experiential levels Television is permitted to rise in respectability once it is connected to more highly valued media and audiences Legitimation works by denigrating ordinary television associated with the past distancing the television of the present from the feminized and mass audiences assumed to be inherent to the old TV It is no coincidence that the most validated programming and technologies of the convergence era are associated with a more privileged viewership The legitimation of television articulates the medium with the masculine over the feminine the elite over the mass reinforcing cultural hierarchies that have long perpetuated inequalities of gender and class Legitimizing Television urges readers to move beyond the question of taste whether TV is good or bad and to focus instead on the cultural political and economic issues at stake in television's transformation in the digital age ES&T Presents Audio Troubleshooting and Repair ,1999 This book provides information that will make it possible for technicians and electronics hobbyists to service audio faster more efficiently and more economically This makes it more likely that consumers will choose not to discard their faulty products but will have them restored by a trained professional *Screen Digest* ,2003
