LDAP Tim Howes,Mark Smith,1997 Two years ago the Internet Engineering Task Force began studying directory protocols searching

for a solution to outdated protocols That search prompted the creation of LDAP the new protocol for inter network directory services Since that time Microsoft Netscape IBM Novell and other companies have adopted LDAP as a complete directory services solution This is the essential resource for programmers software engineers and network administrators who need to understand and implement LDAP to keep software applications compliant If you design or program software for network computing or are interested in directory services LDAP Programming Directory Enabled Applications with Lightweight Directory Access Protocol is an essential resource to help you understand the LDAP API learn how to write LDAP programs understand how to LDAP enable an existing application and learn how to use a set of command line LDAP tools to search and update directory information **Visual Basic Programmer's Guide to the .NET Framework Class Library** Lars Powers, Mike Snell, 2002 The definitive reference every VB NET developer needs to understand the capabilities of NET namespaces and increase productivity inside the NET framework Understanding LDAP - Design and Implementation Steven Tuttle, Ami Ehlenberger, Ramakrishna Gorthi, Jay Leiserson, Richard Macbeth, Nathan Owen, Sunil Ranahandola, Michael Storrs, Chunhui Yang, IBM Redbooks, 2006-07-19 The implementation and exploitation of centralized corporate wide directories are among the top priority projects in most organizations The need for a centralized directory emerges as organizations realize the overhead and cost involved in managing the many distributed micro and macro directories introduced in the past decade with decentralized client server applications and network operating systems Directories are key for successful IT operation and e business application deployments in medium and large environments IBM understands this requirement and supports it by providing directory implementations based on industry standards at no additional cost on all its major platforms and even important non IBM platforms The IBM Directory Server implements the Lightweight Directory Access Protocol LDAP standard that has emerged quickly in the past years as a result of the demand for such a standard This IBM Redbooks publication will help you create a foundation of LDAP skills as well as install and configure the IBM Directory Server It is targeted at security architects and specialists who need to know the concepts and the detailed instructions for a successful LDAP implementation **Novell's Guide to Troubleshooting eDirectory** Peter Kuo, Jim Henderson, 2004-07-08 Novell eDirectory formerly Novell Directory Services NDS is employed by system administrator to define users on the network and links those same users to their access rights with corporate resources devices like printers and security policies Novell eDirectory is comparable to Microsoft s Active Directory and is designed for large scale high end directory deployments Its strengths are scalability and reliability a flexible yet strong security architecture compatibility with key industry standards and operating systems Novell s Guide to Troubleshooting eDirectory is the definitive source for information on eDirectory troubleshooting techniques It is the single stop reference covering topics from good design to proactive reactive problem resolution All of the information presented in this book has been gathered from hands on real world experiences of the authors The ABCs of LDAP Reinhard E. Voglmaier, 2003-11-13 Until now it has been difficult to

find the right source of information on LDAP and directory server implementations books on the subject are overly product specific and a search on the Web results in information overload The ABCs of LDAP How to Install Run and Administer LDAP Services strikes the right balance providing a synopsis of LDAP fundamentals without getting wrapped up in one particular implementation This book is for network and systems administrators who want to begin using LDAP more extensively It delivers the theoretical background needed to understand how these servers work resulting in clear concise examples of implementations in both commercial and OpenLDAP environments The text is structured so that each chapter can stand on its own with brief descriptions of terms supplemented by references to more detailed explanations in other chapters You also benefit from a concise overview of how to design a directory preparing you to execute directory deployments for email PKI DNS NIS servers and many other productivity enhancing applications Topics include major LDAP APIs such as PHP Perl and Java as well as distributed command line tools The book covers ways to integrate LDAP into existing systems and provides hands on examples within working implementations

American Indian Studies Program Guide Byron Lee Blackwell, Byron Lee Blackwell Jd Ed D., 2010-12 In this increasingly homogenous society the American Indian Studies Program Guide provides a framework for college educators and administrators to develop degree programs focusing on American Indian studies with an eye toward creating future leaders for Indian communities These degree programs are intended to help American Indians gain control of their own educational systems and develop institutions that can help to reverse the alarmingly high dropout rate This book provides all the tools necessary for college educators and administrators to develop top notch programs including Diagnostic tests to determine students level of knowledge Defined learning goals and objectives Seminar descriptions Established grading criteria Useful outside resources Six courses make up the interdisciplinary curriculum The North American Indian American Indian History American Indian Law and Federal Policy American Indian Religion and Philosophy American Indian Literature and the History of American Indian Education The American Indian Studies Program Guide offers a proven approach and insights into the problems American Indians have faced in the past and the battles they continue to fight today

Rational Application Developer V7.5 Programming Guide Ueli Wahli, Miguel Vieira Ferreira Lopes Gomes, Brian Hailey, Ahmed Moharram, Juan Pablo Napoli, Marco Rohr, Henry Cui, Patrick Gan, Celso Gonzalez, Pinar Ugurlu, Lara Ziosi, IBM Redbooks, 2009-06-29 IBM Rational Application Developer for WebSphere Software v7 5 Application Developer for short is the full function Eclipse 3 4 based development platform for developing Java™ Standard Edition Version 6 Java SE 6 and Java Enterprise Edition Version 5 Java EE 5 applications with a focus on applications to be deployed to IBM WebSphere Application Server and IBM WebSphere Portal Rational Application Developer provides integrated development tools for all development roles including Web developers Java developers business analysts architects and enterprise programmers Rational Application Developer is part of the IBM Rational Software Delivery Platform SDP which contains products in four life cycle categories Architecture management which includes

integrated development environments Change and release management Process and portfolio management Quality management This IBM Redbooks™ publication is a programming guide that highlights the features and tooling included with Rational Application Developer v7.5 Many of the chapters provide working examples that demonstrate how to use the tooling to develop applications as well as achieve the benefits of visual and rapid application development This publication is an update of Rational Application Developer V7 Programming Guide SG24-7501 **AUGN**, 1997-08 *Understanding and Deploying LDAP Directory Services* Tim Howes, Mark Smith, Gordon S. Good, 2003 Lightweight Directory Access Protocol LDAP is the standard for directory information access and is the underlying protocol for a variety of email systems Web systems and enterprise applications LDAP enables central management of users groups devices and other data thereby simplifying directory management and reducing the total cost of ownership *Understanding and Deploying LDAP Directory Services* written by the creators of the protocol is known as the LDAP bible and is the classic text for learning about LDAP and how to utilize it effectively The Second Edition builds on this success by acting as an exhaustive resource for designing deploying and maintaining LDAP directory services Topics such as implementation pitfalls establishing and maintaining user access to information troubleshooting and real world scenarios will be thoroughly explored **Perl for System**

Administration David N. Blank-Edelman, 2000 Some people plan to become administrators The rest of us are thrust into it we are webmasters hobbyists or just the default technical people on staff who are expected to keep things running After some stumbling around repeating the same steps over and over again and occasionally paying the price when we forget one we realize that we must automate these tasks or suffer endless frustration Thus enters Perl The Perl programming language is ideal for writing quick yet powerful scripts that automate many administrative tasks It's modular it's powerful and it's perfect for managing systems and services on many platforms Perl for System Administration is designed for all levels of administrators from hobbyists to card carrying SAGE members sysadmins on multi platform sites Written for several different platforms Unix Windows NT and Mac OS it's a guide to the pockets of administration where Perl can be most useful for sites large and small including Filesystem management User administration with a dash of XML DNS and other network name services Database administration using DBI and ODBC Directory services and frameworks like LDAP and ADSI Using email for system administration Working with log files of all kinds Each chapter concentrates on a single administrative area discusses the possible pitfalls and then shows how Perl comes to the rescue Along the way we encounter interesting Perl features and tricks with many extended examples and complete programs The scripts included in the book can simply be used as written or with minimal adaptation But it's likely that readers will also get a taste of what Perl can do and start extending those scripts for tasks that we haven't dreamed of Perl for System Administration doesn't attempt to teach the Perl language but it is an excellent introduction to the power and flexibility of Perl and it whets the appetite to learn more It's for anyone who needs to use Perl for system administration and needs to hit the ground running I/O Configuration Using

z/OS HCD and HCM Karan Singh, Preben Esbensen, Peter Hoyle, Mark Pope, Jean Sylvester, IBM Redbooks, 2010-05-18 IBM System z servers offer a full range of connectivity options for attaching peripheral or internal devices for input and output to the server. At the other end of these connections are a variety of devices for data storage, printing, terminal I/O, and network routing. This combination of connectivity and hardware offers System z customers solutions to meet most connectivity requirements. However, to make use of these features, the System z server must be properly configured. This IBM Redbooks publication takes a high-level look at the tools and processes involved in configuring a System z server. We provide an introduction to the System z channel subsystem and the terminology frequently used in the hardware definition process. We examine the features and functions of tools used in the hardware definition process, such as HCD CHPID Mapping Tool and HCM. We discuss the input and output of these tools, IODF, IOCP, IOCDS, and their relationship to one another. We also provide a high-level overview of the hardware configuration process, the flow of generating a valid I/O configuration. We provide configuration examples using both HCD and HCM. The book also discusses available new functions and guidelines for the effective use of HCD and HCM. This document is intended for system programmers and administrators who are responsible for defining and activating hardware changes to z/OS and System z servers and for the IBM representatives who need this information. General knowledge of z/OS and IOCP is assumed.
