McQuail's Reader in Mass Communication Theory Denis McQuail, 2002-04-22 This text is a companion to McQuail's *Mass Communication Theory* but can be used independently. It is a resource of statements drawn from communication studies, media sociology, and cultural studies.

Mass Media James B. Martin, 2002 Mass media has become an integral part of the human experience. News travels around the world in a split second, affecting people in other countries in untold ways. Although being on top of the news may be good at least for news junkies, mass media also transmits values or the lack thereof, condenses complex events and thoughts to simplified sound bites, and often ignores the essence of an event or story. The selective bibliography gathers the books and magazine literature over the previous ten years while providing access through author title and subject indexes.

The second edition of *Diversity in U.S. Mass Media* presents a review of the evolution and the many issues surrounding portrayals of social groups in the mass media of the United States. The revised second edition is filled with recent illustrative examples from the media. Comprehensive in scope, the authors address a wide range of issues that include representations of race, ethnicity, gender, sexual orientation, disability, class, and religion in films, television, and the press. The authors encourage readers to question what is being presented and explore the extent to which they agree with the perspectives that are described. *Diversity in U.S. Mass Media* is an important resource that offers an understanding of how various social groups are being represented in the mass media. Explores how diverse communities inform and intersect with one another. Draws on updated studies on the topic and presents original research and observations. America's Schools and the Mass Media collectively explore the contents of mass media and how it shapes educational programming and policy making The editors claim that American schooling for the past forty years has less to do with a learning agenda and pedagogy than with economic competition and national security The editors and contributors to this important volume contend that American public schooling has historical roots as a crucible for democratic government This ideal has not only grown increasingly suspect in recent years but is now commonly assailed as a brake on both economic growth and intellectual excellence The editors ask what minimum skills and knowledge one must possess in order to participate in the life of the nation if not in the life of the mind The essays by Gerald Grant Bella Rosenberg Charles T Salmon Joan Richardson and Susan Tifft take direct aim at this issue with surprising but stimulating results The volume begins with Myron Lieberman's law to wit the more important an educational question the less people know about it The remainder of the contributions aim to begin removing this law with a more salutary understanding The twelve essays that constitute the work deal with the interplay of educational and media institutions what students learn and how they learn it with a special emphasis on the long and questionable history of corporate special interest and government attempts to shape the beliefs of future citizens and present consumers The volume closes with a full scale effort to review the nation's educational priorities and how questions of school choice are entwined with those of media choice
