Memorandum Of Mths Papper 2014 Prep Paper1:

Conformal Symmetry Breaking Differential Operators on Differential Forms Matthias Fischmann, Andreas Juhl, Petr Somberg, 2021-06-18 We study conformal symmetry breaking differential operators which map differential forms on R^n to differential forms on a codimension one subspace R^{n-1} . These operators are equivariant with respect to the conformal Lie algebra of the subspace R^{n-1} . They correspond to homomorphisms of generalized Verma modules for $so(n-1)$ into generalized Verma modules for $so(n-1,1)$ both being induced from fundamental form representations of a parabolic subalgebra. We apply the F-method to derive explicit formulas for such homomorphisms. In particular we find explicit formulas for the generators of the intertwining operators of the related branching problems restricting generalized Verma modules for $so(n-1,1)$ to $so(n-1)$. As consequences we derive closed formulas for all conformal symmetry breaking differential operators in terms of the first order operators d and $\bar{d}$ and certain hypergeometric polynomials. A dominant role in these studies is played by two infinite sequences of symmetry breaking differential operators which depend on a complex parameter. Their values at special values of λ appear as factors in two systems of factorization identities which involve the Branson-Govorkova operators of the Euclidean metrics on R^n and R^{n-1} and the operators d and $\bar{d}$ as factors respectively. Moreover they naturally recover the gauge companion and Q-curvature operators of the Euclidean metric on the subspace R^{n-1} respectively.

Title Announcement Bulletin, 1957 Nuclear Science Abstracts, 1963 *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims, activities and events.

The Performance of Africa's International Courts James Thuo Gathii, 2020-11-26 The performance of international courts has traditionally been judged against criteria of compliance and effectiveness. Whilst these are clearly desirable objectives for litigants before Africa's international courts, this book shows that we must look beyond these criteria to fully appreciate the impact of these courts. This book shows how litigants use their participation in international litigation to achieve other objectives: to amplify political disputes with their governments to build their movement to educate the public about their cause and to challenge the status quo. Chapters in this collection show how these courts act as coordination points for opposition political parties to name and shame dominant parties for violation of their organizational rights. Others demonstrate how Africa's international courts serve as transitional justice mechanisms in which truth-telling about ongoing conflict and authoritarian governance receives significant attention. This attention serves as a platform to galvanize resistance against continued authoritarian rule especially from outside the conflict countries. Ultimately the book shows that these courts must be judged against new and broader criteria and understood as increasingly important venues for waging political, social, environmental and legal struggles.
