A Brief Overview of China's ETS Pilots Daiqing Zhao, Wenjun

Wang,Zhigang Luo,2018-08-27 This book systematically introduces readers to the framework of China's ETS pilots exploring their design and operating process the current state of the carbon market and various barriers encountered To do so it deconstructs the Guangdong ETS which is the largest and most representative of China's seven ETS pilots The book subsequently describes and evaluates all seven pilots in terms of their efficiency macro and micro effects the method involved in the DEA model the CGE model and cost benefit analysis In turn in the assessment section it demonstrates how some ETS pilots have failed to control carbon emissions due to inordinately high emissions quotas issued by the local government etc Further it argues that ETS should focus on those industries with large emissions and high mitigating potential for the time being and then gradually expand the scale of its coverage As China's national ETS is slated for launch on the basis of the lessons learned from the ETS pilots the book offers a timely and valuable resource for all those who want to understand and forecast the development of China's ETS It includes a wealth of descriptions and explanations of Chinese government policies involving carbon emissions control making it a unique resource Environmental and Natural Resource Economics Jonathan M. Harris,Brian Roach,2017-06-26 Environmental issues are of fundamental importance and a broad approach to understanding the relationship of the human economy and the natural world is essential In a rapidly changing policy and scientific context this new edition of Environmental and Natural Resource Economics reflects an updated perspective on modern environmental topics Now in its fourth edition this book includes new material on climate change the cost competitiveness of renewable energy global environmental trends and sustainable economies The text provides a balanced treatment of both standard environmental economics and ecological economics based on the belief that these two approaches are complementary Several chapters focus on the core concepts of environmental economics including the theory of externalities the management of public goods the allocation of resources across time environmental valuation and cost benefit analysis Material on ecological economics includes such topics as macroeconomic scale entropy and green national accounting Topical chapters focus on energy climate change water resources international trade forests fisheries and agriculture with an emphasis on designing effective policies to promote sustainability and a green economy Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment This perspective combined with its emphasis on real world policies is particularly appealing to both instructors and students This is the ideal text for classes on environmental natural resource and ecological economics The book's companion website is available at http://www.bu.edu/eci/education/materials/textbooks/environmental_and_natural_resource_economics Unfinished Business Tamim Bayoumi,2017-09-19 A penetrating critique tracing how under regulated trading between European and U S banks led to the 2008 financial crisis with a prescription for preventing another meltdown There have been numerous books examining the 2008 financial crisis from either a U S or European perspective Tamim Bayoumi is the first to explain how the Euro crisis and U S housing crash were in fact parasitically intertwined Starting in the 1980s

Bayoumi outlines the cumulative policy errors that undermined the stability of both the European and U S financial sectors highlighting the catalytic role played by European mega banks that exploited lax regulation to expand into the U S market and financed unsustainable bubbles on both continents U S banks increasingly sold sub par loans to under regulated European and U S shadow banks and when the bubbles burst the losses whipsawed back to the core of the European banking system A much needed fresh look at the origins of the crisis Bayoumi s analysis concludes that policy makers are ignorant of what still needs to be done both to complete the cleanup and to prevent future crises *Good Faith in Insurance and*

Takaful Contracts in Malaysia Haemala Thanasegaran,2016-01-22 This book examines good faith in non marine insurance and takaful Islamic insurance contracts in Malaysia and proposes holistic law reform of the same The first two thirds of the book comprise an extensive comparative legal analysis of the issues between Malaysia Australia and the United Kingdom with the final third dedicated to a socio economic analysis of law reform and suggestions for law reform particularly suited to Malaysia The book evaluates whether the duty of utmost good faith the cornerstone of insurance and takaful contracts is effectively regulated and in turn observed by insurers and takaful operators and insureds alike in Malaysia The adequacy of the Insurance Act 1996 Malaysia the Takaful Act 1984 Malaysia the Financial Services Act 2013 Malaysia and the Islamic Financial Services Act 2013 Malaysia is evaluated along with the supporting infrastructure and oversight measures introduced by the Malaysian government In doing so The book examines the duty of utmost good faith from both a doctrinal and a social science perspective in order to propose suitable legal reform **Declining Profitability and the Evolution of**

the US Economy Ascension Mejorado,Manuel Roman,2023-09-01 The 1970s were a pivotal decade for the US economy deindustrialization broke the power of the labor unions and made possible the redistribution of income in favor of corporate profits globalization and offshore investments opened alternatives to domestic nonfinancial capital accumulation domestic productivity growth declined and labor saving technology empowered superstar corporations to rapidly gain market share This book argues that the persistent fall in profitability leading to the stagflation crisis was a direct result of the transition from the Fordist phase of capital accumulation based on large scale manufacturing to the neoliberal phase and the rising power of finance Neoliberalism restored the power of rentiers but not the profit rates of nonfinancial corporations Falling accumulation rates weakened the growth capacity of nonfinancial corporate firms and secular stagnation became the norm Neo Keynesian economists Larry Summers and Paul Krugman explained the persistence of secular stagnation with arguments borrowed from Alvin Hansen in the 1930s such as the declining birth rate or the falling relative prices of investment goods hence a shortfall of demand In the Classical paradigm profitability drives capital accumulation and falling profitability slows down growth As the accumulation rate declined and the capacity growth diminished breakdowns in supply links due to the COVID 19 pandemic prevented large infusions of purchasing power to find matching levels of supply hence the stagflation crisis returned The book will be a great asset to researchers and scholars interested in the development of

Classical Political Economy concerning issues related to inflation stagnation growing inequality and the next phase of neoliberalism

Milton Friedman Jennifer Burns, 2023-11-14 An Economist Best Book of 2023 One of The New York Times 33 Nonfiction Books to Read This Fall Named a most anticipated fall book by the Chicago Tribune and Bloomberg Finalist for the 2024 Hayek Book Prize Wherever you sit on the political spectrum there s a lot to learn from this book More than a biography of one controversial person it s an intellectual history of twentieth century economic thought Greg Rosalesky NPR s Planet Money The first full biography of America s most renowned economist Milton Friedman was alongside John Maynard Keynes the most influential economist of the twentieth century His work was instrumental in the turn toward free markets that defined the 1980s and his full throated defenses of capitalism and freedom resonated with audiences around the world It s no wonder the last decades of the twentieth century have been called the Age of Friedman or that analysts have sought to hold him responsible for both the rising prosperity and the social ills of recent times In *Milton Friedman* the first full biography to employ archival sources the historian Jennifer Burns tells Friedman s extraordinary story with the nuance it deserves She provides lucid and lively context for his groundbreaking work on everything from why dentists earn less than doctors to the vital importance of the money supply to inflation and the limits of government planning and stimulus She traces Friedman s long standing collaborations with women including the economist Anna Schwartz his complex relationships with powerful figures such as the Federal Reserve chairman Arthur Burns and the Treasury secretary George Shultz and his direct interventions in policymaking at the highest levels Most of all Burns explores Friedman s key role in creating a new economic vision and a modern American conservatism The result is a revelatory biography of America s first neoliberal and perhaps its last great conservative

Consumer Involvement in Private EU Competition Law Enforcement Maria Ioannidou, 2015-09-03 Despite the growing importance of consumer welfare in EU competition law debates there remains a significant disconnect between rhetoric and reality as consumers and their interests still play only an ancillary role in this area of law *Consumer Involvement in Private EU Competition Law Enforcement* is the first monograph to exclusively address this highly topical and much debated subject providing a timely and wide ranging examination of the need for more active consumer participation in competition law Written by an expert in the field it sets out a comprehensive framework of policy implications and arguments for greater involvement positioning the debate in the context of a broader EU law perspective It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment Finally the book identifies key institutional and political obstacles to the adoption of effective measures and suggests alternative routes to enhance the role of consumers in private competition law enforcement The book s innovative approach combining normative analysis and practical solutions make it invaluable for academics policy makers and practitioners in the field

Economics, Game Theory And International Environmental Agreements: The Ca' Foscari Lectures Henry Tulkens, 2019-05-29 The science and management of environmental problems is a vast area comprising both

the natural and social sciences and the multidisciplinary links often make these issues challenging to comprehend Economics Game Theory and International Environmental Agreements The Ca Foscari Lectures aims to introduce students to the multidimensional character of international environmental problems in general and climate change in particular Ecology economics game theory and diplomacy are called upon and brought together in the common framework of a basic mathematical model Within that framework and using tools from these four disciplines the book develops a theory that aims to explain and promote cooperation in international environmental affairs Other books on the topic tend to be research oriented volumes of various papers Instead this is a book that offers a reasonably sized synthesis of the multidimensional societal problems of transfrontier pollution particularly of climate change It uses mathematical modeling of economic and game theory concepts to examine these environmental issues and demonstrate many results in an accessible fashion Readers interested in understanding the links between ecology and economics as well as the connection between economics and institutional decision making will find in this text not only answers to many of their queries but also questions for further thinking

Bioenergy and Land Use Change Zhangcai Qin, Umakant Mishra, Astley Hastings, 2017-11-06 Although bioenergy is a renewable energy source it is not without impact on the environment Both the cultivation of crops specifically for use as biofuels and the use of agricultural byproducts to generate energy changes the landscape affects ecosystems and impacts the climate Bioenergy and Land Use Change focuses on regional and global assessments of land use change related to bioenergy and the environmental impacts This interdisciplinary volume provides both high level reviews and in depth analyses on specific topics Volume highlights include

Land use change concepts economics and modeling Relationships between bioenergy and land use change Impacts on soil carbon soil health water quality and the hydrologic cycle Impacts on natural capital and ecosystem services Effects of bioenergy on direct and indirect greenhouse gas emissions Biogeochemical and biogeophysical climate regulation Uncertainties and challenges associated with land use change quantification and environmental impact assessments Bioenergy and Land Use Change is a valuable resource for professionals researchers and graduate students from a wide variety of fields including energy economics ecology geography agricultural science geoscience and environmental science Read an interview with the editors to find out more <https://eos.org/editors-vox/bioenergys-impacts-on-the-landscape> The Irish Welfare State in the Twenty-First Century Mary P. Murphy, Fiona Dukelow, 2016-10-04 This book provides a critical and theoretically informed assessment of the nature and types of structural change occurring in the Irish welfare state in the context of the 2008 economic crisis Its overarching framework for conceptualising and analysing welfare state change and its political economic and social implications is based around four crucial questions namely what welfare is for who delivers welfare who pays for welfare and who benefits Over the course of ten chapters the authors examine the answers as they relate to social protection labour market activation pensions finance water early child education and care health housing and corporate welfare They also innovatively address the impact of crisis on the welfare state in Northern Ireland The result is to isolate key drivers of structural welfare reform and assess how globalisation financialisation neo liberalisation privatisation marketisation and new public management have deepened and diversified their impact on the post crisis Irish welfare state This in depth analysis will appeal to sociologists economists political scientists and welfare state practitioners interested in the Irish welfare state and more generally in the analysis of welfare state change **The Shadow Banking System** Valerio Lemma, 2016-04-08 The book shows the fundamentals of the shadow banking system and its entities operations and risks Focusing on the regulatory aspects it provides an original view that is able to demonstrate that the lack of supervision is a market failure **Handbook on Green Growth** Roger Fouquet, 2019 Economies around the world have arrived at a critical juncture to continue to grow fuelled by fossil fuels and exacerbate climate change or to move towards more sustainable greener growth Choosing the latter is shown to help address climate change as well as present new economic opportunities This Handbook provides a deeper understanding of the concept of green growth and highlights key lessons from the experience of green transformations across the world following a decade of ambitious stimulus packages and green reforms *African Economic Outlook 2016 Sustainable Cities and Structural Transformation* African Development Bank, OECD, United Nations Development Programme, 2016-05-23 This report presents the continent's current state of affairs and forecasts its situation for the coming two years It examines Africa's performance in crucial areas macroeconomics financing trade policies and regional integration human development and governance **Macroeconomic Measurement Versus Macroeconomic Theory** Merijn Knibbe, 2019-12-06 Ideally scientific theory and scientific measurement should

develop in tandem but in recent years this has not been the case in economics. There used to be a time when leading economists or their students established or led statistical offices and took care that the measurements were consistent with the theory and vice versa. Not anymore. Macroeconomic theorists and macroeconomic statisticians do not even speak the same language any longer. They do use the same words such as consumption, investments or unemployment but the meanings can often be different. This book maps the differences between macroeconomic theory and measurement and explores them in some detail while also tracking their intellectual, historical and in some cases ideological origins. It also explores the possible policy implications. In doing so, the book draws on two separate strands of literature which are seldom used in unison: macro statistical manuals and theoretical macro papers. By doing so, the book contributes to the effort to bridge the gap between them without compromising on the idea that a meaningful science of economics should in the end be based upon individual people and households and their social and cultural embedding instead of a representative consumer or Robinson Crusoe figure. This work is essential reading for students, economists, statisticians and professionals.

Foreign Policies of EU Member States Amelia Hadfield, Ian Manners, Richard G. Whitman, 2017-06-14. Foreign Policies of EU Member States provides a clear and current overview of the motivations and outcomes of EU Member States regarding their foreign policy making within and beyond the EU. It provides an in-depth analysis of intra EU policy making and sheds light in an innovative and understandable way on the lesser known aspects of the inter EU and extra EU foreign policies of the twenty-eight Member States. The text has an innovative method of thematic organisation in which case study state profiles emerge via dominant foreign policy themes. The text examines the three main policy challenges currently faced by the twenty-eight Member States. First, EU Member States must cooperate within the mechanisms of the EU including the Common Foreign and Security Policy (CFSP). Second, EU Member States continue to construct their own inter EU foreign policies. Third, the sovereign prerogative exercised by all EU Member States is to construct their own foreign policies on everything from trade and defence with the rest of the world. This combination of clarity, thematic structure and empirical case studies make this an ideal textbook for all upper-level students of European foreign policy, comparative European politics and European studies.

Research Data Management - A European Perspective Filip Kruse, Jesper Boserup, Thestrup, 2017-12-04. Based on case studies, this book offers an insight in various European activities and practices in data management and their interaction with policies and programs. The latter form the background for the following case studies, which provide the conceptual framework at the same time, giving an exhaustive understanding of the specific subjects. The case studies share common themes and give a concrete insight into vital issues such as web archiving, digitization of analog archives, researchers' motivations for sharing data and how libraries, archives and researchers can collaborate in creating research tools and services.

The Governance of Smart Transportation Systems Matthias Finger, Maxime Audouin, 2018-08-22. This book presents essential new governance structures to embrace and regulate smart mobility modes. Drawing on a range of case studies, it paves the way for new
