Craig, 2024-09-24 With the stagnant low percentages of women in STEM careers identifying practices to satisfy the growing need for professionals in those fields is critical to improve recruitment and retention Supportive relationships like mentors and sponsors have been shown to both inspire women to pursue those careers and to help them succeed in them This book explores how developing supportive connections helps students faculty and teachers see STEM professions as being a place for women to grow and succeed Early chapters provide essential mentor characteristics and explore engineering education gender inequity from a teacher's perspective of stereotypes stereotype threat and bias offering culturally relevant teacher mentoring approaches to promote equitable pre college engineering education Middle chapters describe K 12 mentoring programs mentorship initiatives empowering young South African Women and girls to advance to mathematical related careers programs methods and activities to achieve the desired goal of making young students aspire to become scientists and engagement year round in grades 9 12 combined with 40 years of iterative evaluation created a finely honed enrichment program for low income Black women in urban public high schools A longitudinal undergraduate mentoring program for mentoring early college students in Louisiana provides further insights in that section The final four chapter section describes mentoring programs for professors and teachers reciprocal mentor relationships and role shifting within an informal peer mentoring group differences between mentoring relationships and sponsoring relationships within academia the impact of culturally responsive mentorship CRM on the development and expression of a pre service teacher's woman of science identity and a program that aims to recruit and retain STEM pre service teachers and STEM teachers of color With several longitudinal mentoring programs several programs for women of color this book fills a gap to help grow the numbers of women in STEM

America's Search for Security Sean Kay, 2014-07-22 This book details the ways in which America's ascendancy to global superpower status was the result of its dueling foreign policy philosophies and forces an historically expansive idealism balanced with an equally constant realist restraint In America's Search for Security Sean Kay surveys major historical trends in American foreign policy and provides a new context for thinking about America's rise to power from the founding period through the end of the Cold War It details the post Cold War rise of idealist foreign policy goals and the costs of abandoning realist roots analyzing in depth the wars in Iraq and Afghanistan as examples of what disappointing if not disastrous outcomes can befall America abroad when foreign policy objectives are muddled unclear and fail to remain grounded in what historically has made America an unquestionable world power This book also focuses on America's recent pivot to Asia and efforts to restore a realist balance abroad and at home in the second Obama administration concluding with a look at what the future of American power will look like in a rapidly evolving world in need of newer more modernized and adaptable forms of leadership Tracing the tension between idealism and realism Kay provides a detailed explanation of the

rise of a post Cold War idealist consensus in Washington D C and shows how that culminated in a return to realism in both the 2013 debates over intervention in Syria and the 2014 crisis with Russia *Museology* Mr. Rohit Manglik,2024-02-19

Environmental Risk of Oil Spills with ERA Acute Cathrine Stephansen, Anders Bjørgesæter, Odd Willy Brude, Ute Brønner, Tonje Waterloo Rogstad, Grethe Kjeilen-Eilertsen, Jean-Marie Libre, Christian Collin-Hansen, 2021-05-05 This open access book introduces readers to a new methodology for assessing the risks to the marine environment following accidental oil spills The methodology will soon be implemented on the Norwegian Continental Shelf and will be complemented by guidelines for its use in a regulatory framework The brief book is intended to provide international readers with a basic grasp of what the ERA Acute methodology consists of what its applications are and the underlying impact and restoration models used in its development The content is divided into three main parts an introduction and overview of risk management applications for generalists at the management level a model overview for generalist scientists and a more detailed final section for risk assessment professionals which presents the results of the validation and sensitivity testing British Nuclear Weapons and the Test Ban 1954-1973 Dr John R Walker, 2013-06-28 In 1962 Dean Acheson famously described Britain as having lost an Empire but not yet found a role Perhaps nowhere is this more apparent than in the realms of nuclear weapons An increasingly marginal world power successive post war British governments felt that an independent nuclear deterrent was essential if the country was to remain at the top table of world diplomacy Focusing on a key twenty year period

this study explores Britain's role in efforts to bring about a nuclear test ban treaty between 1954 and 1973. Taking a broadly chronological approach, it examines the nature of defence planning, the scientific goals that nuclear tests were designed to secure, Anglo-American relationships, the efficacy of British diplomacy and its contribution to arms control and disarmament. A key theme of the study is to show how the UK managed to balance the conflicting pressures created by its determination to remain a credible nuclear power whilst wanting to pursue disarmament objectives and how these pressures shifted over the period in question. Based on a wealth of primary sources, this book opens up the largely ignored subject of the impact of arms control on the UK nuclear weapons programme. Its appraisal of the relationship between the requirements and developments of the UK nuclear weapons programme against international and domestic pressures for a test ban treaty will be of interest to anyone studying post-war British defence and foreign policy, history of science, arms control, disarmament and non-proliferation and international relations. It also provides important background information on current events involving nuclear proliferation and disarmament.

Where Have All the Democrats Gone? Ruy Teixeira, John B. Judis, 2023-11-07. A Wall Street Journal Best Political Book of 2023. A much needed wake up call for the Democrats which reveals how the party has lost sight of its core principles and endangered its political future from the authors of one of the most influential political books of the 21st century. The New York Times: For decades American politics has been plagued by a breakdown between the Democratic and Republican parties in which victory has inevitably led to defeat and vice versa. Both parties have lost sight of the people at the center of the American electorate leading to polarization and paralysis. In *Where Have All the Democrats Gone*, John B. Judis and Ruy Teixeira reveal the tectonic changes shaping the country's current political landscape that both pundits and political scientists have missed. The Democratic Party once the preserve of small towns as well as big cities and of the industrial working class and the newly immigrated has abandoned and even actively alienated many of these voters. In this clarion call and essential argument for common sense and common ground, Judis and Teixeira reveal the transformation of American politics and provide a razor sharp critique of where the Democrats have gone awry and how they can avoid political disaster in the days ahead.

Towards Operational Disequilibrium Macro Economics J.C. Siebrand, 2013-04-17. Most recent contributions to disequilibrium theory have a high level of abstraction. Empirical studies explicitly based on disequilibrium are still relatively scarce. However, empirical macro economics anticipated the theoretical development and amalgamated classical and Keynesian elements often without a clear cut formal base. Now a theoretical integration of neo-classical and neo-Keynesian economics seems under way. There is a renewed interest in the micro-economic foundations of macroeconomics with a special focus on the behaviour of economic agents operating in non-clearing markets. In some instances, these theoretical developments offer an ex post justification for empirical macro-economic practices. Generally, however, they call for new ways of empirical macro-economic model building. This study operates on the border line between empirical macro economics and theoretical disequilibrium macro-economic theory. Our interest in macro-economic

disequilibrium originates from the empirical side Foreign trade relations for several countries revealed significant pressure of demand effects Hence the spillover of excess demand in domestic markets to foreign markets seemed a rather general phenomenon This fact could be explained by a theory that states that actual demand for products from domestic firms will generally and systematically differ from the ex ante demand as suggested by equilibrium analysis This latter demand concept comes close to Clower's notional demand and Patinkin's potential demand

Levees and the National Flood Insurance Program National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Levees and the National Flood Insurance Program: Improving Policies and Practices, 2013-08-18 The Federal Emergency Management Agency's FEMA Federal Insurance and Mitigation Administration FIMA manages the National Flood Insurance Program NFIP which is a cornerstone in the U.S. strategy to assist communities to prepare for, mitigate against, and recover from flood disasters The NFIP was established by Congress with passage of the National Flood Insurance Act in 1968 to help reduce future flood damages through NFIP community floodplain regulation that would control development in flood hazard areas provide insurance for a premium to property owners and reduce federal expenditures for disaster assistance The flood insurance is available only to owners of insurable property located in communities that participate in the NFIP Currently the program has 5,555,915 million policies in 21,881 communities³ across the United States The NFIP defines the one percent annual chance flood 100 year or base flood floodplain as a Special Flood Hazard Area SFHA The SFHA is delineated on FEMA's Flood Insurance Rate Maps FIRM's using topographic meteorologic hydrologic and hydraulic information Property owners with a federally backed mortgage within the SFHAs are required to purchase and retain flood insurance called the mandatory flood insurance purchase requirement MPR Levees and floodwalls hereafter referred to as levees have been part of flood management in the United States since the late 1700's because they are relatively easy to build and a reasonable infrastructure investment A levee is a man-made structure usually an earthen embankment designed and constructed in accordance with sound engineering practices to contain, control, or divert the flow of water so as to provide protection from temporary flooding A levee system is a flood protection system which consists of a levee or levees and associated structures such as closure and drainage devices which are constructed and operated in accordance with sound engineering practices Recognizing the need for improving the NFIP's treatment of levees FEMA officials approached the National Research Council's NRC Water Science and Technology Board WSTB and requested this study The NRC responded by forming the ad hoc Committee on Levees and the National Flood Insurance Program Improving Policies and Practices charged to examine current FEMA treatment of levees within the NFIP and provide advice on how those levee-related policies and activities could be

improved The study addressed four broad areas risk analysis flood insurance risk reduction and risk communication regarding how levees are considered in the NFIP Specific issues within these areas include current risk analysis and mapping procedures behind accredited and non accredited levees flood insurance pricing and the mandatory flood insurance purchase requirement mitigation options to reduce risk for communities with levees flood risk communication efforts and the concept of shared responsibility The principal conclusions and recommendations are highlighted in this report **Natural Catastrophe Risk Management and Modelling** Kirsten Mitchell-Wallace,Matthew Jones,John Hillier,Matthew Foote,2017-04-24 This book covers both the practical and theoretical aspects of catastrophe modelling for insurance industry practitioners and public policymakers Written by authors with both academic and industry experience it also functions as an excellent graduate level text and overview of the field Ours is a time of unprecedented levels of risk from both natural and anthropogenic sources Fortunately it is also an era of relatively inexpensive technologies for use in assessing those risks The demand from both commercial and public interests including re insurers NGOs global disaster management agencies and local authorities for sophisticated catastrophe risk assessment tools has never been greater and contemporary catastrophe modelling satisfies that demand Combining the latest research with detailed coverage of state of the art catastrophe modelling techniques and technologies this book delivers the knowledge needed to use interpret and build catastrophe models and provides greater insight into catastrophe modelling s enormous potential and possible limitations The first book containing the detailed practical knowledge needed to support practitioners as effective catastrophe risk modellers and managers Includes hazard vulnerability and financial material to provide the only independent comprehensive overview of the subject accessible to students and practitioners alike Demonstrates the relevance of catastrophe models within a practical decision making framework and illustrates their many applications Includes contributions from many of the top names in the field globally from industry academia and government **Natural Catastrophe Risk Management and Modelling A Practitioner s Guide** is an important working resource for catastrophe modelling analysts and developers actuaries underwriters and those working in compliance or regulatory functions related to catastrophe risk It is also valuable for scientists and engineers seeking to gain greater insight into catastrophe risk management and its applications Good Jew, Bad Jew Steven Friedman,2023-11-01 Shows how anti Semitism has been distorted to serve the Israeli state Good Jew Bad Jew is a critique by one of South Africa s foremost political theorists of mainstream understandings of Jewishness Steven Friedman offers a searing analysis of the weaponisation of anti Semitism in service of political objectives that support the Israeli state and global white supremacy Looking specifically at the way in which language is used to shape identities Friedman uses many examples to illustrate how anti Semitism and anti Semites are increasingly defined as anything and anyone that opposes the interests and policies of the Israeli state The use of anti racist language to defend racial domination distorts not only the meaning of what it is to be Jewish but sheds light on how all dogmatic nationalisms function Friedman

uses India and South Africa as examples but the analysis applies across the world too Good Jew Bad Jew does not offer a simplistic binary understanding of Jewishness and the actions of the Israeli state and ideology It is a detailed deeply researched and critical work that will appeal to both specialists and general readers looking for a considered view on how language shapes belief systems and how the powerful forces of racism and nationalism and their opponents are being misrepresented Ploughshares and Swords Jayita Sarkar,2022-07-15 India s nuclear program is often misunderstood as an inward looking endeavor of secretive technocrats In Ploughshares and Swords Jayita Sarkar challenges this received wisdom narrating a global story of India s nuclear program during its first forty years The book foregrounds the program s civilian and military features by probing its close relationship with the space program Through nuclear and space technologies India s leaders served the technopolitical aims of economic modernity and the geopolitical goals of deterring adversaries The politically savvy transnationally connected scientists and engineers who steered the program obtained technologies materials and information through a variety of state and nonstate actors from Europe and North America including both superpowers They thus maneuvered around Cold War politics and the choke points of the nonproliferation regime Hyperdiversification increased choices for the leaders of the nuclear program but reduced democratic accountability at home The nuclear program became a consensus enforcing device in the name of the nation Ploughshares and Swords is a provocative new history with global implications It shows how geopolitical and technopolitical visions influence decisions about the nation after decolonization Thanks to generous funding from the Swiss National Science Foundation the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories
