Oct/Nov 2014 Exam paper: Section A

Good afternoon Students

I will start by looking at the ENG 1502 exam of Oct/Nov 2014. You will find these previous exam paper on the ENG1502 site under official study material.

Please post possible answers to Section A, question 1,2 and 3

Question 1

I suggest you consult your notes of Unit 2 for this question.

You are provided with a diagram and asked to explain the manner, place and voicing of the boded sounds. You will need to answer such a question in the same way the example is. E.g. a) 'sh' in the word fashion – pronounced like the sh in shoe and is classified as a voiceless alveolar palatal fricative.

Do the same for b-e

Question 2

Syllables. You need to state how many syllables there are in each word.

e.g. Country has 2 syllables.

Provide the answers for b-e

Question 3

Memorandum Economics Pfor Oct Nov 2014:

Economics of the International Coal Trade Lars Schernikau, 2017-01-02 This book is the 2nd edition of the *Economics of the International Coal Trade*. Coal is the single most important source of power on our planet and today accounts for 40% of electricity generation and 30% of primary energy. The world's appetite for energy is still far from being met. Until 2050 an additional 6 billion people will require access to proper power. *Why Coal Continues to Power the World* introduces the reader to the global coal business: its importance, its source, its global demand, supply and trade, its use, its environmental impact and its future. Despite recent price hikes, coal does not appear to be a popular subject today, which may explain the little attention it receives in the scientific community. Since writing the first edition during the commodity super cycle in 2006-2008, the world has changed. How has this impacted the global world of coal? This book is useful to energy economists, businessmen, politicians, university professors, high school teachers, students, and anyone with an interest in how the world is powered. It is also helpful to anyone studying climate change and global warming. This new edition of the book includes previously not covered special sections on Coal analysis and sampling, with a special section on moisture. A technical summary of all key coking coal characteristics in Appendix 2. Coking coal, iron ore, and the steel industry. Cement and petcoke markets. Global gas markets and the shale gas revolution in the US. Nuclear energy and the history of the oil market. Renewable energy and the German Energiewende. Power plant technology and CO₂ sequestration and processing. The role of CO₂ and why man-made CO₂ does not cause global warming. Apart from giving an in-depth overview of the global coal business, in this book the author argues that coal is far from dead. Some of my key messages are contrary to popular beliefs. The importance of coal will further increase in absolute and likely even in relative terms for decades to come. Man-made CO₂ has no effect on global temperatures and combustion of fossil fuels does not influence the weather. We cannot stop the advance of coal; we can only make this process as environmentally sustainable as humanly possible. Therefore, mankind needs to embrace coal as the bridge from the Oil Age to the Solar Age through the New Energy Revolution. 4 Industrialized nations have to invest in coal and in all means to more efficiently burn coal in order to truly help the global environment and reduce global dust, SO_x and NO_x emissions.

Humanitarian Economics Gilles Carbonnier, 2015-01-03 While the booming humanitarian sector faces daunting challenges, humanitarian economics emerges as a new field of study and practice, one that encompasses the economics and political economy of war, disaster, terrorism, and humanitarianism. Carbonnier's book is the first to present humanitarian economics to a wide readership, defining its parameters, explaining its utility, and convincing us why it matters. Among the issues he discusses are how emotions and altruism are incorporated within a rational choice framework. How do the economics of war and terrorism inform humanitarians' negotiations with combatants and shed light on the role of aid in conflict? What do catastrophe bonds and risk-linked securities hold for disaster response? As more actors enter the humanitarian marketplace, including private firms, Carbonnier's revealing portrayal is especially timely, as is his critique of

the transformative power of crises **Environmental and Natural Resource Economics** Jonathan M. Harris, Brian Roach, 2017-06-26 Environmental issues are of fundamental importance and a broad approach to understanding the relationship of the human economy and the natural world is essential In a rapidly changing policy and scientific context this new edition of Environmental and Natural Resource Economics reflects an updated perspective on modern environmental topics Now in its fourth edition this book includes new material on climate change the cost competitiveness of renewable energy global environmental trends and sustainable economies The text provides a balanced treatment of both standard environmental economics and ecological economics based on the belief that these two approaches are complementary Several chapters focus on the core concepts of environmental economics including the theory of externalities the management of public goods the allocation of resources across time environmental valuation and cost benefit analysis Material on ecological economics includes such topics as macroeconomic scale entropy and green national accounting Topical chapters focus on energy climate change water resources international trade forests fisheries and agriculture with an emphasis on designing effective policies to promote sustainability and a green economy Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment This perspective combined with its emphasis on real world policies is particularly appealing to both instructors and students This is the ideal text for classes on environmental natural resource and ecological economics The book's companion website is available at http://www.bu.edu/eci/education/materials/textbooks/environmental_and_natural_resource_economics Regional Institutions, Geopolitics and Economics in the Asia-Pacific Steven B. The Decline of America David D. Schein, 2018-02-13 The Decline of America offers a carefully documented analysis of the last seventeen U S presidents These men eight Democrats and nine Republicans have shaped the last 100 years not only for America but for the world Each president is profiled with unsparing scrutiny so we can see where it s all gone wrong David Schein follows these critiques by proposing ways to improve America s outlook for the next 100 years before it s too late

The Military Revolution and Revolutions in Military Affairs Mark Fissel, 2022-12-05 The Military Revolution and Revolutions in Military Affairs updates two central debates in military history the one surrounding the concept of military revolution and the one on military affairs whilst advancing original research in both fields Only a handful of publications consider the military revolution and the RMA in tandem This book breaks new ground conceptually and appeals to an exceptionally large and diverse readership Comparative revisionist studies of the military revolution and RMA better enable us to comprehend the historical continuum and reveal the new RMA for what it is And for what it is shortly to become This book presents original contributions within the epicentre of the military revolution debate the 1500s with an emphasis on gunpowder revolution offensively and defensively The connections with the Revolution in Military Affairs are then made explicit by scholars a practitioner and an analyst with an emphasis on airborne lethal autonomous weapons systems This is a chronologically broad and unique methodological approach to a historical debate that begs for clarification as we enter an era where killer robots will almost certainly take from humans their monopoly on violence

under a Changing Climate Mark W. Rosegrant, Mercedesita A. Sombilla, 2018-11-30 The Philippine economy has grown rapidly since 2010 but despite this growth poverty and inequality remain high Two thirds of the poor live in rural areas and the weak performance of the agriculture sector has contributed to the slow improvement in livelihoods The challenge for agriculture will further increase with climate change posing a growing threat to the sector But agricultural transformation to spur sustained growth and reduce poverty is still possible under climate change with aggressive institutional reforms and implementation of the right mix of policies and programmes The identification of the suitable policy and programme combination requires an accurate assessment of the key drivers of agricultural growth and food security the impacts of climate change on agriculture and the overall economy and the effectiveness of policies for adaptation and growth This book

addresses these big issues focusing on enhancing the adaptation capacity of the Philippine agriculture sector. It is designed to provide a much needed base of knowledge and menu of policy options to support decision and policymaking on agriculture, climate change and food security. The volume uses newly generated data modelling outputs and innovative analyses to provide a scientific basis for a variety of adaptation measures under different sets of climate change scenarios to guide decision makers in strategic planning and policy formulation. As we have actually experienced in Leyte, an island province in the Visayas where Super Typhoon Yolanda Haiyan struck, disasters caused by natural hazards could completely negate economic gains, devastate families and shatter dreams. Our greatest challenge is to make ourselves better prepared for and be more resilient to such disasters. Natural hazards need not always lead to loss of so many lives and properties. This book shows us ways and provides tools to draw up climate change and socioeconomic scenarios at the regional and provincial levels, allowing us to identify strategies for mitigating climate change risks.

Ernesto M. Pernia, Secretary of Socioeconomic Planning, National Economic and Development Authority, Philippines. This book by top Philippine researchers combines state of the art biophysical and economic modeling of climate impacts and adaptation policies with in depth synthesis of agriculture, natural resources, climate trends and policies. It provides a comprehensive assessment of climate change impacts on agriculture and the broader economy to provide important insights for Philippine policymakers.

Dynamic Shipping and Port Development in the Globalized Economy Paul Yae-Woo Lee, Kevin Cullinane, 2016-04-29. This two volume book presents an in depth analysis of many of the most important issues facing today's shipping and port sectors. Volume 1 of *Dynamic Shipping and Port Development in the Globalized Economy* focuses on the application of theory to practice in Maritime Logistics.

The Great Transition: Shifting from Fossil Fuels to Solar and Wind Energy Lester R. Brown, 2015-04-20. The great energy transition from fossil fuels to renewable sources of energy is under way. As oil insecurity deepens, the extraction risks of fossil fuels rise and concerns about climate instability cast a shadow over the future of coal, a new world energy economy is emerging. The old economy, fueled by oil, natural gas and coal, is being replaced with one powered by wind, solar and geothermal energy. The Great Transition details the accelerating pace of this global energy revolution. As many countries become less enamored with coal and nuclear power, they are embracing an array of clean renewable energies. Whereas solar energy projects were once small scale, largely designed for residential use, energy investors are now building utility scale solar projects. Strides are being made: some of the huge wind farm complexes under construction in China will each produce as much electricity as several nuclear power plants, and an electrified transport system supplemented by the use of bicycles could reshape the way we think about mobility.

Dying of Whiteness Jonathan M. Metzger, 2019-03-05. A physician's provocative Boston Globe and timely Ibram X Kendi New York Times Book Review account of how right wing backlash policies have deadly consequences even for the white.

voters they promise to help In election after election conservative white Americans have embraced politicians who pledge to make their lives great again But as physician Jonathan M Metzl shows in *Dying of Whiteness* the policies that result actually place white Americans at ever greater risk of sickness and death Interviewing a range of everyday Americans Metzl examines how racial resentment has fueled progun laws in Missouri resistance to the Affordable Care Act in Tennessee and cuts to schools and social services in Kansas He shows these policies costs increasing deaths by gun suicide falling life expectancies and rising dropout rates Now updated with a new afterword *Dying of Whiteness* demonstrates how much white America would benefit by emphasizing cooperation rather than chasing false promises of supremacy Winner of the Robert F Kennedy Book Award
