Lingenfelter, 2023-07-03 How can we fix our schools Improve graduation rates in college What works These are questions that make the headlines and vex policy makers practitioners and educational researchers While they strive to improve society there are frequently gulfs of mutual incomprehension among them Academics longing for more influence may wrongly fault irrationality ideology or ignorance for the failure of research to inform policy and practice more powerfully Policy makers and practitioners may doubt that academics can deliver ideas that will reliably yield desirable results This book bridges the divide It argues that unrealistic expectations lead to both unproductive research and impossible standards for evidence based policy and practice and it offers promising ways for evidence to contribute to improvement It analyzes the utility and limitations of the different research methods that have been applied to policy and practice as well as the strengths and weaknesses of educational reform strategies It explains why using evidence for accountability often makes things worse rather than better Paul Lingenfelter offers educational researchers and policy makers a framework for considering such questions as What problems are important and accessible What methods will be fruitful Which help policy makers and practitioners make choices and learn how to improve What information is relevant What knowledge is valid and useful How can policy makers and practitioners establish a more productive division of labor based on their respective capabilities and limitations He cautions against the illusion that straight forward scientific approaches and data can be successfully applied to society's most complex problems While explaining why no single policy or intervention can solve complex problems he concludes that determination measurement analysis and adaptation based on evidence in specific situations can lead to significant improvement This positive even handed introduction to the use of research for problem solving concludes by suggesting emerging practices and approaches that can help scholars practitioners and policy leaders become more successful in reaching their fundamental goals Making College Work Harry J. Holzer, Sandy Baum, 2017-08-15 Practical solutions for

improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying The authors provide a new review of the causes of these problems and offer promising policy solutions The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students Some solutions including better financial aid or academic supports target individual students Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process While no single policy is guaranteed to greatly improve college and career outcomes implementing a number of evidence based policies and programs together has the potential to improve these outcomes substantially

Decision Making for Student Success Benjamin L. Castleman, Saul Schwartz, Sandy Baum, 2015-03-12 Each year many students with affordable college options and the academic skills needed to succeed do not enroll at all enroll at institutions where they are not well positioned for success or drop out of college before earning a credential Efforts to address these challenges have included changes in financial aid policy increased availability of information and enhanced academic support This volume argues that the efficacy of these strategies can be improved by taking account of contemporary research on how students make choices In *Decision Making for Student Success* scholars from the fields of behavioral economics education and public policy explore contemporary research on decision making and highlight behavioral insights that can improve postsecondary access and success This exciting volume will provide scholars researchers and higher education administrators with valuable perspectives and low cost strategies that they can employ to improve outcomes for underserved populations

Fiscal Therapy William G. Gale, 2019-03-01 Keeping the economy strong will require addressing two distinct but related problems Steadily rising federal debt makes it harder to grow our economy boost our living standards respond to wars or recessions address social needs and maintain our role as a global leader At the same time we have let critical investments lag and left many people behind even as overall prosperity has grown In *Fiscal Therapy* William Gale a leading authority on how federal tax and budget policy affects the economy provides a trenchant discussion of the challenges posed by the imbalances between spending and revenue America is facing a gradual decline as debt accumulates and delay raises the costs of action But there is hope fiscal responsibility aligns with both conservative and liberal goals and citizens of all stripes can support the notion of

making life better for our children and grandchildren Gale provides a plan to make the economy and nation stronger one that controls entitlement spending but preserves and enhances their anti poverty and social insurance roles increases public investments on human and physical capital and raises and reforms taxes to pay for government services in a fair and efficient way What is needed he argues is to balance today s needs against tomorrow s obligations We face significant fiscal challenges but if we are wise enough to seize our opportunities we can strengthen our economy increase opportunity reduce inequality and build better lives for our children and grandchildren We do not have to kill popular programs or starve government Indeed one main goal of fiscal reform is to maintain the vital functions that government provides We need to act responsibly pay for the government we want and shape that government in ways that serve us best

Public Policy and Higher Education Edward P. St. John, Nathan J. Daun-Barnett, Karen M. Moronski-Chapman, 2018-05-04 Public Policy and Higher Education provides readers with new ways to analyze complex state policies and offers the tools to examine how policies affect students access and success in college Rather than arguing for a single approach the authors examine how policymakers and higher education administrators can work to inform and influence change within systems of higher education using research based evidence along with consideration of political and historical values and beliefs Raising new questions and examining recent developments this updated edition is an invaluable resource for graduate students administrators policymakers and researchers who seek to learn more about the crucial contexts underlying policy decisions and college access Special Features Case Studies allow readers to examine strategies used by different types of colleges to improve access and retention Reflective Exercises encourage readers to discuss state and campus context for policy decisions and to think about the strategies used in a state or institution Approachable Explanations unpack complex public policies and financial strategies for readers who seek understanding of public policy in higher education Research Based Recommendations explore how policymakers higher education administrators and faculty can work together to improve quality diversity and financial stewardship New epilogues and a revised Part III reexamine themes and encourage critical thinking about inequality and policy change
