

A low-angle, upward-looking perspective of several modern skyscrapers with glass facades. The buildings are arranged in a way that they seem to converge towards the top of the frame. The sky is a clear, bright blue with some soft, white clouds. The overall composition conveys a sense of height, power, and modernity.

Financialization and Macroeconomics Giovanni Scarano, 2022-12-30 Financialisation has become a widely discussed and debated term leading to a plurality of perspectives but no fixed definition or single reading This book presents a critical exploration and review of the current literature on financialisation focusing on the financialisation of NFCs and its possible implications for the macroeconomic and financial stability of advanced countries Starting from this critical analysis it proposes some new readings of the process of financialisation linking it directly on the one hand to the evolution of interest bearing capital and the credit system and on the other hand to the historical tendencies of monopoly capital towards financial arrangements to manage corporate control Finally a conceptual scheme for interpretation and a mathematical model of corporate portfolio choice is developed to explain how the tendency in developed countries to place growing shares of social surplus in speculative financial channels can contribute to their long term real stagnation The book also underlines the excessive attention usually being paid to some micro epiphenomena that show a fallacy of composition at the macroeconomic level and can lead to some misunderstandings of the general trends in capitalist evolution Moreover some doubts are raised about the extent to which financialisation actually represents a change to the present regime of accumulation The book targets all the scholars who are interested in better understanding whether financialisation constitutes a profound change in the functioning of capitalist economic systems and what effects it can produce in social welfare in the advanced countries

Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2 0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

Handbook on Critical Political Economy and Public

Policy Christoph Scherrer, Ana Garcia, Joscha Wullweber, 2023-01-20 This comprehensive and stimulating Handbook examines the contribution of political economy to public policy. It provides an overview of several strands of critical political economy supported by case studies from OECD countries, Latin America, South Africa and South and East Asia. *One Currency, Two Europes: Towards A Dual Eurozone* Bruno Dallago, 2016-05-24 The aftermath of the US subprime mortgage crisis in 2008 saw its influence spread around the world including Europe. The European crisis turned out to be longer, deeper and more resilient than anticipated. An unexpected consequence was the increasingly divergent economic and financial situation of two main groups of countries within the Eurozone which includes the countries that adopt the euro as their common currency. The divergence was caused by a number of factors fundamentally stemming from the dissimilar economic and financial situation of its member countries and from the incomplete institutional architecture and the monetary and fiscal policies in the Eurozone. *One Currency Two Europes Towards a Dual Eurozone* seeks to explore these factors which give rise to the Eurozone's asymmetric composition and the growing difficulties and ineffectiveness that policies meet. It presents evidence to show how the presently incomplete institutional architecture of the Eurozone is the main reason for the extreme detrimental effects of the international crisis and austerity policies along with the asymmetric economic situation and the insufficient mutual trust demonstrated by the vulnerable as well as resilient countries. Other than presenting a complete overview and analysis of the events that unfolded in the Eurozone as a result of the financial crisis that first emerged in the US, this book also suggests possible solutions which could help to reunify the Eurozone and make the common currency sustainable and beneficial for all member countries. *One Currency Two Europes* will be useful for policymakers who want to learn from the Eurozone's experience with the financial crisis and the importance of complete institutional architectures and inter-country economic convergence. It will also serve as a reference to students and researchers who would like more in-depth analysis of the crisis and the Eurozone's fiscal, monetary and institutional past, present and future.

Combating Inequality Alexander Gallas, Hansjörg Herr, Frank Hoffer, Christoph Scherrer, 2015-12-22 Economic inequality has recently gained considerable academic attention. However, two important aspects of inequality have not been discussed systematically: its multidimensional nature and the question of what can be done to reverse it. This book offers insights from scholars representing the Global Labour University which operates in Brazil, Germany, India, South Africa and the US. They analyse the various drivers of inequality, assess policy responses and discuss counterstrategies. The main findings of this book are that rising levels of inequality cannot be addressed only with the standard policy responses, namely education, redistribution and green growth. In addition, the way markets currently function needs to be corrected. The chapters in this volume focus on specific fields of contemporary capitalism where important drivers of inequality are located: for example, the labour market, the financial system, the tax system, multi-national corporations and gender relations. Other chapters discuss in detail where

political opportunities for change lie They critically assess existing countermeasures the idea of a green economy and its implications for inequality and existing campaigns by trade unions and new social movements against inequality In line with the global nature of the problem this book contains case studies on countries both from the north and south with considerable economic and political weight This book provides academics political practitioners and civil society activists with a range of ideas on how to drive back inequality It will be of interest to those who study political economy development economy and labour economics
