

# Light Duty Electronic Air Command™

## INSTALLATION INSTRUCTIONS

Congratulations on your purchase of a Light Duty Electronic Air Command™ kit. This kit was designed to provide inflation control of your air helper springs. This kit will be an asset to your vehicle, meeting nearly all of your air supply needs.

Please take a few minutes to read through the instructions to identify the components and learn how to properly install your Light Duty Electronic Air Command™ kit.

### NOTE:

The Light Duty Electronic Air Command™ kit can be used with all air helper spring products. If you are installing an air suspension system, do not install the air line tubing to the air springs as stated in the suspension system instruction manual. If you are adding the Light Duty Electronic Air Command™ kit to an existing air suspension system, you will need to deflate the air springs and remove the air line tubing.

## NOTE ON CONNECTING AIR LINE TUBING

Cut the air line tubing as squarely as possible. To connect the air line tubing to the fittings, push the tubing into the fittings as far as possible. If for any reason the tubing must be removed, first release the air pressure from the air helper spring. Push the collar towards the body of the fitting and then pull out the tubing. To reassemble, make sure the tubing is cut squarely and push the tubing back into the fitting.
