foremost in almost every attempt at educational reform Recent research on the topics of motivation self efficacy attribution theory implicit personality theory goal orientation and resiliency has provided new insights about the malleability of mindsets in learners Appropriate challenges and feedback seem to be the key factors in determining whether a student gives up or perseveres towards an objective This book is written for teachers parents and other student advocates who want to help students become autonomous enthusiastic lifelong learners The purpose of this book is to inform adults about motivational theory and more importantly to give them concrete applicable guidelines along with specific examples about what to say and what not to say to learners The title Fall Down 7 Times Get Up 8 implies that failure is not only a possibility it is a very concrete way of gaining ground The author aims to change the conversation from today's Failure is not an option We can utilize what seems to be failure as the next logical step towards one's goals Students need to be taught to view failure as a temporary glitch and a step towards success rather than as a permanent state of being In layman's terms the author explains the research behind her ideas while offering down to earth often humorous real life examples
