*Wired-Up Wrong - Asperger Syndrome, 'Normal', and Me* Neil Shepherd, 2007-03-01 Growing up is never easy but what's it like if you're different? Actually, what's it like if you're different but you don't know that you're different? Having led what he thought was a normal life for 31 years, our plucky hero's world was thrown into confusion when he was diagnosed with something called Asperger Syndrome. But people don't catch Asperger Syndrome, so where did it come from? Was it there all along and not noticed? Set against the backdrop of the North East of England in the 70s and 80s and having to cope with life with a disabled father as well as facing the everyday challenges that most people take for granted, this is the insider's view of one boy's life with AS from the safety of make-believe worlds to the terrifying depths of suicide, self-harming and isolation. Sometimes harrowing, sometimes surreal but never dull, this is the story of a little boy's struggle to not only grow up and survive in the world but to find out what he truly was.

Completely up to date and written in an engaging style, this book covers the nature of learning, techniques of assessment with an emphasis on current developments in the national curriculum, recent findings on the impact of differences in individual pupils, schools and teachers' ways of involving and motivating pupils, the importance of social disadvantage and cultural differences of ethnicity and gender in determining attainment, the nature of children's language literacy development and the relationship between them, behavioural problems and how to deal with them, key concepts in special needs and the nature of additional provision. Martyn Long encourages teachers to evaluate alternative approaches involved in educational policies and to develop their own teaching methods and whole school principles and procedures. The book is illustrated throughout with topical statistics, cartoons and empirical material. Each chapter includes a summary, suggestions for further reading and has a list of key implications which can be applied by students in a problem-based scenario. There are questions for discussion which are later followed up in the appendix.
