Times , 2023 24 UPSC State PSC Pre General Studies Vol 2 Indian World Geography Solved Papers      **Planning and Design for Sustainable Urban Mobility** Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change

troublemaker a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she s taught speak to her curiosity and insight crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools she exposes the shortcomings of her classrooms academic environments by challenging both the content and the methods of her education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners

Environmental Education in Indonesia Lyn Parker,Kelsie Prabawa-Sear,2019-08-08 Indonesia s wealth of natural resources is being exploited at breakneck speed and environmental awareness and knowledge among the populace is limited This book examines how young people learn about the environment to see how education can help to develop environmental awareness and avert vast environmental destruction not only in Indonesia but also in the Global South more generally Based on in depth studies conducted in the cities of Yogyakarta and Surabaya complemented with surveys of students in secondary schools Environmental Education in Indonesia examines educational curricula pedagogy and green activities to reveal what is currently being done in schools to educate children about the environment The book investigates the shortcomings in environment education including underqualified teachers the civil service mentality the still pervasive chalk and talk pedagogy and the effect of the examination system It also analyses the role of local government in supporting or not environmental education and the contribution of environmental NGOs The book establishes that young people are not currently being exposed to effective environmental education and the authors propose that the best and most culturally appropriate way forward in Indonesia is

to frame pro environment behaviour and responsibility as a form of citizenship and specifically that environmental education should be taught as a separate subject This book will be of great interest to students and scholars of contemporary Indonesia and Southeast Asia education for sustainability and environmental education as well as sustainability and sustainable development more generally The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9780429397981> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
