Teaching Learners with Visual Impairment

Maximus M. Sefotho, Ronél Ferreira, 2020-12-31 This book *Teaching Learners with Visual Impairment* focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment. *Twenty-Twenty Hindsight* Mosiuoa Sekese, 2013-05-16 Twenty twenty hindsight means perfect understanding of events only after they have happened. In his book Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new democratic regime. His story is highly personal but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. I had a quick read and I find the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed but which few people have the guts and conviction to paint into words. Mathematical Mindsets Jo Boaler, 2022-02-15 Reverse mathematics trauma and find a universal blueprint for math success. In *Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching*, mathematics education expert and best-selling author Jo Boaler delivers a blueprint to banishing math anxiety and laying a foundation for mathematics success that anyone can build on. Perfect for students who have been convinced they are naturally bad at math, the author offers a demonstration of how to turn self-doubt into self-confidence by relying on the mindset framework. *Mathematical Mindsets* is based on thousands of hours of in-depth study and research into the most effective and ineffective ways to teach math to young people. This new edition also includes brand new research from the last five years that sheds brighter light on how to turn a fear of math into an enthusiastic desire to learn. Developed ideas about ways to bring about equitable grouping in classrooms. New initiatives to bring 21st-century mathematics to K-12 classrooms. *Mathematical Mindsets* is ideal for K-12 math educators. It also belongs on the bookshelves of the parents interested in helping their K-12 children with their math education as well as school administrators and educators in training.
