**Einstein's Wife** Allen Esterson, David C. Cassidy, 2020-02-25. The real life story behind Marie Benedict's *The Other Einstein*, a fascinating profile of mathematician Mileva Einstein Mari and her contributions to her husband's scientific discoveries. Albert Einstein's first wife, Mileva Einstein Mari, was forgotten for decades. When a trove of correspondence between them, beginning in their student days, was discovered in 1986, her story began to be told. Some of the tellers of the Mileva Story made startling claims that she was a brilliant mathematician who surpassed her husband and that she made uncredited contributions to his most celebrated papers in 1905, including his paper on special relativity. This book, based on extensive historical research, uncovers the real Mileva Story. Mileva was one of the few women of her era to pursue higher education in science; she and Einstein were students together at the Zurich Polytechnic. Mileva's ambitions for a science career, however, suffered a series of setbacks: failed diploma examinations, a disagreement with her doctoral dissertation adviser, an out-of-wedlock pregnancy by Einstein. She and Einstein married in 1903 and had two sons, but the marriage failed. So was Mileva: her husband's uncredited coauthor, unpaid assistant or his essential helpmeet. It's tempting to believe that she was her husband's secret collaborator, but the authors of *Einstein's Wife* look at the actual evidence, and a chapter by Ruth Lewin Sime offers important historical context. The story they tell is that of a brave and determined young woman who struggled against a variety of obstacles at a time when science was not very

welcoming to women Given the barriers women in science still face Mileva s story remains relevant Washington Post
